Guitar Exercises - Section VIII, Level 66

A harmonic minor five-position map, horizontal routes, sequences, seams, and full-register movement

FIXED KEY: A | 8 MODULES | 898 TONES

Level 65 established the sound and harmony of A harmonic minor. Level 66 turns that theory into a connected fretboard system. Five overlapping three-note-per-string frames cover frets 5-17; seam loops, horizontal lanes, sequence cells, and full-neck zigzags prevent any position from becoming an isolated box.

1. Learn five frames

Each frame contains 18 ascending tones, an exact reverse descent, note names, degrees, fingerings, and tonic locations.

2. Connect every seam

Seven-note single-string loops cross two shared anchors and one new destination before returning.

3. Hear the characteristic tones

G# must lead to A; F-to-G# must remain a controlled augmented second rather than a rushed hand jump.

Five connected three-note-per-string frames

```
P1  TONIC FRAME          frets 5-10    low-E start A  / degree 1
P2  SECOND-DEGREE FRAME  frets 7-12    low-E start B  / degree 2
P3  FLAT-THIRD FRAME     frets 8-13    low-E start C  / degree b3
P4  FOURTH-DEGREE FRAME  frets 10-16   low-E start D  / degree 4
P5  FIFTH-DEGREE FRAME   frets 12-17   low-E start E  / degree 5

Scale:   A  B  C  D  E  F  G#
Degrees: 1  2  b3 4  5  b6 7
Steps:   W  H  W  W  H  aug2 H
```

Written workload

Module	Tones
A - positions	180
B - seams	168
C - lanes	94
D - sequences	88
E - zigzags	180
F - characteristic	60
G - seam phrases	64
H - capstone	64
TOTAL	898

Session protocol

Choose one position, one seam or lane, and one musical application. Begin with strict alternate picking and clean tone. Say every degree 7 and b6 aloud. The three-fret F-to-G# movement is relocated, not forced into a fixed hand stretch.

PICKING RULE All printed position, seam, lane, sequence, and zigzag cells are fully picked before any legato or slide variation.

A roots:   E5  D7  B10  A12  G14  E17  e17
G# leads:  D6  B9   A11  G13  e16
F starts:  A8  B6   A8   G10  e13

Hear: F -> G# -> A  and  G# -> A
```

Connection rule

At a seam, keep the shared notes in time, preview the destination fret, release excess pressure, and move only after the last shared tone. Do not hide a late shift with an unplanned slide. Slides become a later variation after the fully picked connection is secure.
