Guitar Exercises - Section VIII, Level 68

E Phrygian dominant, diminished-seventh symmetry, dominant tension colors, and improvisation synthesis

A HARMONIC MINOR | 11 MODULES | 630 TONES

Level 67 mapped the harmonic-minor modes and their chord functions. Level 68 turns the dominant region into a complete improvisation system: E Phrygian dominant, E7b9, the G#dim7 upper structure, diminished symmetry, borrowed #9 color, cadence construction, call and response, and long-form resolution.

1. Hear E7 inside the mode

E Phrygian dominant is E-F-G#-A-B-C-D. The chord tones E-G#-B-D must remain audible beneath the b9, 11, and b13 colors.

2. Use diminished symmetry functionally

G#dim7 repeats every three frets. The shape may rotate, but in A minor its job remains leading-tone resolution or the upper structure of E7b9.

3. Budget the tension

Add b9, borrowed #9, 11, or b13 one at a time. Combine them only after the destination chord and final target remain clear.

Dominant-color atlas

```
E PHRYGIAN DOMINANT   E  F  G# A  B  C   D
E7 ROLES              R  b9 3  11 5  b13 b7

BORROWED BLUES COLOR  G = #9* over E7
CORE E7               E-G#-B-D
E7b9                  E-G#-B-D-F
UPPER STRUCTURE       G#dim7 = G#-B-D-F

Scope boundary

The phrase altered dominant colors in this level means controlled E7 tensions: b9 and b13 from A harmonic minor plus a borrowed blues #9. It does not introduce the complete melodic-minor altered scale. Every non-chord tone must point to a named E7 or A-minor destination.

Safety: use slides instead of forced bends on heavy strings; stop for pain or persistent tension.

Guitar Exercises - Section VIII, Level 68

E Phrygian dominant, E7b9, and diminished-symmetry reference atlas

MODE 5 | V7 FUNCTION | UPPER-STRUCTURE DIMINISHED

CHORD FIRST, MODE SECOND: THE TENSIONS ARE MEANINGFUL BECAUSE E7 RESOLVES TO A MINOR

E Phrygian dominant

```
Notes | E---F---G#--A---B---C---D---E---|
Role  | R---b9--3---11--5---b13-b7--R---|
Form  | 1---b2--3---4---5---b6--b7--1---|
```

Characteristic colors: b9 F, major third G#, and b13 C. The 11 A normally resolves to G# or B when the dominant needs a clearer identity.

E7b9 and the upper-structure diminished chord

```
E7b9     E---G#--B---D---F---
Core E7  E---G#--B---D-------
G#dim7       G#--B---D---F---
```

Remove the E root from E7b9 and the remaining notes form G#dim7. Reinsert E and the diminished arpeggio becomes a dominant upper structure.

Pitch	Role over E7	Source	Primary resolution
E	root	E7 chord tone	remain E or resolve to A
F	b9	A harmonic minor	E or G#
G	#9*	borrowed A-minor/blues color	G#
G#	major third	E7 chord tone	A
A	11	A harmonic minor	G# or B
B	fifth	E7 chord tone	A or remain B
C	b13	A harmonic minor	B
D	flat seventh	E7 chord tone	C or E

Do not use every tension in every E7 bar. The target and resolution must remain more memorable than the tension itself.

Picking passes

1. Strict alternate. 2. Economy within each four-string shape, then reset only after a complete pressure release. 3. Hybrid pick/fingers with balanced volume.

Muting passes

Release each fretted note as the next string sounds. The four tones must never ring together unless the separate blocked-chord variation is requested.

Functional name in A minor: G#dim7. Symmetry changes the inversion and possible enharmonic label, not the intended resolution.

Module G - five-position i-iv-V7-i tension phrases

P4-P5 | 32 TONES

| Am | Dm7 | E7(b9) | Am | - G# MUST RESOLVE INTO A

Four quarter notes per bar. The dominant bar uses E-F-D-G#: root, b9, b7, third. The following A on beat 1 completes the leading-tone resolution.

Module I - minor calls and dominant answers across five positions

5 PAIRS | 80 TONES

THE CALL STAYS INSIDE A-MINOR COLOR; THE ANSWER USES E-PHRYGIAN-DOMINANT TENSION AND RESOLVES

The call and answer use eight tones each. Preserve the rhythmic identity while changing harmonic function. The final A must sound like the completion of the answer, not an extra note after the phrase.

Module K - three-pass harmonic-minor improvisation capstone

16-BAR FORM | CONSTRAINTS CHANGE, FORM DOES NOT

USE THE SAME SIXTEEN-BAR MODEL FORM FOR ALL THREE PASSES

Bars	1-4	5-8	9-12	13-16

Pass 1 - chord tones only

Use triad or seventh-chord tones. One four-note statement per bar. No mode tensions except the written G# leading tone.

Pass 2 - harmonic-minor tensions

Over E7 add F b9, A 11, or C b13 one at a time. Resolve each tension before introducing another.

Pass 3 - diminished and borrowed color

Use the G#dim7 upper structure over E7b9 and one borrowed G #9 in bar 14. Preserve the dominant third G#.

Phrase and space requirements

- [ ] At least one full-beat rest every four bars.
- [ ] One repeated motif across bars 1-4.
- [ ] One register contrast in bars 5-8.
- [ ] One diminished statement in bars 9-12.
- [ ] Tonic close in bar 16.

Recording rubric - 0, 1, or 2

- [ ] Form
- [ ] E7 identity
- [ ] Tension resolution
- [ ] Diminished clarity
- [ ] Motif continuity

Advance the density only after the chord changes remain audible without accompaniment. A sparse phrase with one resolved tension is preferable to a dense phrase that obscures E7 or A minor.

Ear tests

Identify b9, borrowed #9, 3, b13, and b7 over an E drone. Then identify whether G#dim7 resolves to Am or remains unresolved.

Error diagnosis

E7 sounds minor: accent G#. Tension sounds random: name the destination. Diminished cycle blurs: release each note. #9 becomes scale tone: remove G outside E7.

Standard tuning. A harmonic minor / E Phrygian dominant. Starred colors are borrowed or function-specific.

Section VIII mastery gate, completion audit, and practice log

HARMONIC MINOR SECTION COMPLETE

ADVANCE AFTER TWO CLEAN DAYS WITH AUDIBLE DOMINANT FUNCTION AND TONIC RESOLUTION

Mastery gate

- [ ] Play E Phrygian dominant in all five positions and name every E7 role.
- [ ] Play all five E7b9 mirrors and extract the G#dim7 upper structure.
- [ ] Resolve every diminished inversion to A minor and explain G#dim7 function.
- [ ] Perform all five call/response pairs and the sixteen-bar model solo.
- [ ] Complete all six dominant tension cells and distinguish b9, #9*, 11, and b13 by ear.
- [ ] Move the diminished shape through all four minor-third positions without note overlap.
- [ ] Complete all five i-iv-V7-i and iiø-V7-i phrases.
- [ ] Record all three capstone passes without losing form or overusing borrowed G.

Completion audit

- [ ] 5 mode mirrors
- [ ] 5 E7b9 mirrors
- [ ] 4 diminished resolutions
- [ ] 5 call/response pairs
- [ ] 6 tension cells
- [ ] 4 diminished shapes
- [ ] 10 cadence phrases
- [ ] 16-bar solo

Section VIII listening standard

A listener should hear Am as tonic, E7 as the dominant, G# as the leading tone, F as b9 color, C as b13 color, and G#dim7 as a functional upper structure rather than an isolated symmetrical pattern.
