Guitar Exercises - Section VII, Level 59

Major and minor triad arpeggios, inversion starts, and picking systems

SECTION VII START | 1120 ATTACKS

Section VI built chords and triads as simultaneous voicings. Level 59 turns those same three notes into ordered melodic structures. Every arpeggio must preserve chord spelling, separation, muting, picking continuity, and the active harmonic target.

1. Hear the chord inside the line

Block the triad first, then separate the same notes. The arpeggio is a chord unfolded in time.

2. Start from every inversion

Root, third, or fifth may be the lowest note. Inversion identity must remain audible during the route.

3. Compare picking systems

Strict alternate picking crosses every string independently. Economy picking follows the string direction without becoming a strum.

Core formulas

```
MAJOR TRIAD    1-3-5        MINOR TRIAD    1-b3-5

ROOT POSITION  1-3-5        or 1-b3-5
FIRST INV.     3-5-1        or b3-5-1
SECOND INV.    5-1-3        or 5-1-b3

6-NOTE MIRROR  low-middle-high | high-middle-low
ALT PICKING    D-U-D-U-D-U
ECONOMY        D-D-D-U-U-U
5-NOTE LOOP    low-middle-high-middle-low
```

Written workload

Module	Attacks
B - C families	168
C - A families	168
D - picking systems	96
E - 5-note loops	80
F - inversion cycles	144
G - quality switches	96
H - permutations	64
I - scale links	112
J - progressions	128
K - call/response	64
TOTAL	1120

Physical boundary

Alternate picking: one deliberate attack per note. Economy picking: one continuous directional motion, but each string is released or muted before the next speaks. Never let three notes ring as an accidental sweep unless the exercise specifically calls for a blocked chord.

STOP CONDITION Stop for hand pain, persistent tension, or uncontrolled sympathetic ringing.

Guitar Exercises - Section VII, Level 59

Triad formula atlas, silent formation, and transposition commands

48 SILENT FORMATIONS

THE LOWEST STRING OF THE SET DEFINES THE INVERSION START

Set	Major root	Major 1st	Major 2nd	Minor root	Minor 1st	Minor 2nd
G-B-e	r,r,r-2	r,r-1,r-1	r,r+1,r	r,r-1,r-2	r,r,r	r,r+1,r-1
D-G-B	r,r-1,r-2	r,r-2,r-1	r,r,r	r,r-2,r-2	r,r-1,r	r,r,r-1
A-D-G	r,r-1,r-3	r,r-2,r-2	r,r,r-1	r,r-2,r-3	r,r-1,r-1	r,r,r-2
E-A-D	r,r-1,r-3	r,r-2,r-2	r,r,r-1	r,r-2,r-3	r,r-1,r-1	r,r,r-2

Silent C-family commands

For each string set: form C major root, first, and second inversion; then C minor root, first, and second inversion. Name the three notes and bass role before releasing.

```
4 sets x 2 qualities x 3 inversions = 24 formations
COMMAND: root -> quality -> inversion -> string set
```

Silent A-family commands

Repeat the complete command cycle for A major and A minor. Keep fingers within one centimeter of the strings and verify the quality-defining third before moving.

```
4 sets x 2 qualities x 3 inversions = 24 formations
TOTAL SILENT FORMATIONS = 48
```

Root-finding and transposition rule

Root position begins with the chord root on the lowest string. First inversion begins with the chord third or minor third. Second inversion begins with the chord fifth. Find that bass note first, then apply the relative-fret formula for the string set.

Set	Lowest open string	Root command example	Inversion command example
G-B-e	G	C root begins G5	C first begins E on G9
D-G-B	D	A root begins D7	A second begins E on D14
A-D-G	A	C root begins A3	C first begins E on A7
E-A-D	E	A root begins E5	A second begins E on E12

4 CYCLES | 72 ATTACKS

ROOT POSITION -> FIRST INVERSION -> SECOND INVERSION; SIX NOTES PER SHAPE

Treat each inversion as a melodic starting point rather than a chord diagram to memorize. Complete the 18-note cycle without pausing between shapes, then reverse the inversion order.

12 PAIRS | 96 ATTACKS

ONLY THE QUALITY-DEFINING THIRD MOVES

Alternate major and minor eight times while preserving the inversion and string set. Root position moves the middle voice, first inversion moves the bass voice, and second inversion moves the highest voice.

Set	Inversion	Major frets	Minor frets	Moving voice	Attack pattern
G-B-e	root	5-5-3	5-4-3	middle	M-m-M-m | M-m-M-m

QUESTION: 1-T-5-T | ANSWER: 5-T-1-1

Each pair moves from one chord to the next while preserving a recognizable arpeggio rhythm. T means the quality-defining third: 3 in major, b3 in minor. Sustain the final root for the remainder of the second bar.

Error diagnosis

NOTES RING TOGETHER	release each string after its note
ARPEGGIO LOSES QUALITY	say 1-3-5 or 1-b3-5
INVERSION UNKNOWN	name the bass role before playing
ECONOMY BECOMES STRUM	separate attacks and reduce pick depth
ALT PICK RESET	air-pick the complete 6- or 5-note count
STRING SKIP MISSES	look at the destination string before leaving
SCALE HIDES CHORD	accent triad tones, then reduce scale notes

Mastery gate before Level 60

Form and spell all 48 silent C/A commands; play all 48 blocked-plus-arpeggio shapes; demonstrate alternate and economy picking without note overlap; complete all inversion cycles, quality switches, and permutation cells; frame four C-major and four A-minor scale routes with triad arpeggios; track C-F-G-C and Am-Dm-E-Am across all four string sets; perform all eight call-and-response pairs; and meet the standard on two separate days.
