Guitar Exercises - Section VII, Level 62

Diagonal arpeggio connections, string skipping, position shifts, and full-neck motif development

10 MODULES | 788 TONES | FRETS 0-20

Level 61 taught approaches, enclosures, delayed resolutions, and progression-specific phrase construction. Level 62 stretches those harmonic ideas across the full neck. The player must preserve chord identity while skipping strings, changing position, beginning from different inversions, and developing a motif over longer distances.

1. See the landing first

Name the destination note, role, string, and fret before releasing the current position.

2. Skip without sweeping

A skipped string receives no accidental contact. The next sounding string is located before the current note is released.

3. Preserve harmonic identity

Register and contour may change, but the chord role and motif schedule must remain recognizable.

Core phrase architecture

```
DIAGONAL FRAGMENT   chord tone -> higher string -> new fret region
STRING SKIP         current note -> silent string -> destination note
POSITION SHIFT      release -> relocate -> land; no glissando unless marked
INVERSION START     3, 5, 7, b3, b5, or b7 may begin the arpeggio

MAJOR FUNCTION      Dm7 -> G7 -> Cmaj7
MINOR FUNCTION      Bm7b5 -> E7 -> Am7

MOTIF RULE          preserve rhythm, role schedule, or contour across the shift
```

Written workload

Module	Tones
A - triad diagonals	64
B - seventh routes	96
C - string skips	64
D - octave shifts	64
E - inversion chains	96
F - major routes	72
G - minor routes	72
H - motif work	68
I - capstones	128
J - recovery/bridges	64
TOTAL	788

Session protocol

Choose one diagonal fragment, one string-skip or shift cell, and one progression route. Begin at quarter-note speed. After every long shift, pause the exercise rather than the pulse: the hand relocates during the written duration, and the next note must arrive on time.

PICKING RULE Strict alternate picking is the default. Economy motion may connect adjacent strings; it may not brush a skipped string.

Guitar Exercises - Section VII, Level 62

Full-neck connection atlas, shift mechanics, and picking rules

PREVIEW -> RELEASE -> RELOCATE -> LAND

THE DESTINATION IS PART OF THE CURRENT NOTE

Five connection zones

Zone	Fret area	Primary job
Z1	0-5	open/low fragment
Z2	5-9	lower-position connection
Z3	9-13	middle register
Z4	13-17	upper register
Z5	17-20	high-register destination

Shift timing

1. Hear and name the target.
2. Look at the target fret.
3. Release excess pressure.
4. Move thumb and hand together.
5. Land from the bass side or treble side as printed.
6. Re-articulate cleanly; no scrape unless / or \ is marked.

String-skip mechanics

The pick leaves the current string and travels directly to the destination string. The skipped string remains silent. Reduce pick depth, pre-locate the destination, and mute unused strings with both hands.

FAILURE sweep noise, delayed landing, or a visible search for the next string

Picking choices

Adjacent strings: alternate or controlled economy.

Skipped strings: independent pick attacks.

Odd-note loops: starting stroke reverses next repetition.

Long shifts: preserve the stroke cycle through the move.

Muted preview: air-pick the route before sounding it.

4 TRANSFORMATIONS

PRESERVE AT LEAST ONE IDENTITY: RHYTHM, ROLE SCHEDULE, CONTOUR, OR REGISTER RELATIONSHIP

Progression: Dm7 | G7 | Cmaj7 | Cmaj7. The transformation may alter register or note count, but the harmonic targets must remain intentional.

H1 Seed - low register

Roles: b3-5 | 3-b7 | 3-5 | 7-R.

Guitar Exercises - Section VII, Level 62

Practice progression, mastery gate, completion audit, and log

NEXT: ADVANCED ARPEGGIO PICKING AND HYBRID SYSTEMS

ADVANCE WHEN THE FULL-NECK MOVEMENT IS AUDIBLE AS HARMONY, NOT AS FRETBOARD TRAVEL

Ten-phase practice progression

- [ ] 1. Preview destinations silently.
- [ ] 2. Diagonal triad fragments.
- [ ] 3. Seventh-chord routes.
- [ ] 4. String-skip cells.
- [ ] 5. Octave shift landings.
- [ ] 6. Inversion-start chains.
- [ ] 7. Major diagonal cadences.
- [ ] 8. Minor diagonal cadences.
- [ ] 9. Motif transformations.
- [ ] 10. Capstones and recovery bridges.

Error diagnosis

SKIPPED STRING RINGS	reduce pick depth and mute with both hands
SHIFT ARRIVES LATE	preview target; move during the previous duration
CHORD IDENTITY LOST	return to four chord tones in one position
PICK CYCLE RESETS	air-pick through the shift before sounding it
MOTIF DISAPPEARS	preserve rhythm or role schedule; change one variable
REGISTER JUMP RANDOM	connect with a common role or repeated target

Mastery gate before Level 63

- [ ] Complete all eight diagonal triad fragments and six seventh-chord routes with both pick starts.
- [ ] Execute all string-skip and octave-shift cells without unwanted glissando or skipped-string contact.
- [ ] Identify the starting inversion in all eight inversion chains.
- [ ] Perform all six major and six minor diagonal progression routes.
- [ ] Transform the seed motif in eight recognizable ways.
- [ ] Complete both sixteen-bar capstones without resetting the pick cycle or losing the key sequence.
- [ ] Use all recovery cards and at least three bridge templates without stopping the form.

Completion audit and practice log

- [ ] 8 triad diagonals
- [ ] 6 seventh routes
- [ ] 8 skip cells
- [ ] 8 shift cells
- [ ] 8 inversion chains
- [ ] 12 cadence routes
- [ ] 8 motif transforms
- [ ] 2 capstones
