Guitar Exercises - Section VI, Level 53

Major and minor triads across all four adjacent three-string sets

4 STRING SETS | 1248 ATTACKS + 168 SILENT FORMATIONS

Level 52 established root position, first inversion, and second inversion on G-B-e. Level 53 keeps the same triad spelling and inversion logic while moving the harmony through D-G-B, A-D-G, and E-A-D. The new challenge is not learning different chord qualities; it is preserving voice identity, muting, and nearest movement as the string register changes.

1. Keep the inversion name

The lowest string of the active set is the bass. Name whether it carries root, third, or fifth before attacking.

2. Move the three-string window

Mute every string outside the selected set. The chord must sound like three named voices, not a partial barre with leakage.

3. Choose register deliberately

The same chord and inversion can appear in several octaves. Select the string set that supports the rhythm part, melody, or lead fragment.

Four adjacent string sets

```
SET 1-2-3   G-B-e   already introduced in Level 52
SET 2-3-4   D-G-B   crosses the G-to-B tuning offset
SET 3-4-5   A-D-G   three perfect-fourth string gaps
SET 4-5-6   E-A-D   same geometry as A-D-G

TRIAD ORDERS
Major: root 1-3-5 | first 3-5-1 | second 5-1-3
Minor: root 1-b3-5 | first b3-5-1 | second 5-1-b3

Per shape workout: one blocked attack + low-to-high three-note arpeggio = 4 attacks.
```

Written workload

Module	Attacks
B - family maps	672
C - set transfers	96
D - quality switches	96
E - progressions	128
F - patterns	64
G - lead fragments	64
H - capstones	128
TOTAL	1248

Session protocol

Choose one string set, one root family, and one progression. Look-name-form-release every triad silently before its first attack. Use only the selected three strings. After a set-transfer exercise, relax the hand fully before repeating the cycle.

SILENT WORK 4 sets x 7 roots x 2 qualities x 3 inversions = 168 look-name-form-release landings.

Guitar Exercises - Section VI, Level 53

Ear training, random formation, mastery gate, and practice log

NEXT: CAGED AS A CHORD-AND-TRIAD MAP

ADVANCE WHEN THE STRING SET, INVERSION, AND EVERY VOICE CAN BE NAMED

Random-formation commands

1. Draw root, quality, inversion, and string set.
2. Spell the chord and degree order.
3. Name the lowest and highest string.
4. Form silently and release.
5. Verify with one blocked attack.
6. Transfer the same inversion to the next string set.

Ear-training passes

A. Name inversion from the bass voice.
B. Name string set from the register.
C. Hear major/minor while inversion stays fixed.
D. Sing low-middle-high degrees before arpeggiating.
E. Identify the top-voice melody in a progression.
F. Record a set transfer and name every register change.

Mastery gate before Level 54

- [ ] Map all seven natural roots as major and minor triads on all four adjacent string sets.
- [ ] Identify root position, first inversion, and second inversion from the lowest sounding voice.
- [ ] Complete the C/Cm and G/Gm set-transfer cycles without low-string or high-string leakage.
- [ ] Switch C major/minor quality in all twelve set/inversion combinations by moving one voice.
- [ ] Perform all eight nearest-inversion progressions and both sixteen-bar register capstones.
- [ ] Use blocked, arpeggiated, release, top-voice, bass-voice, and lead-fragment patterns cleanly.
- [ ] Pass at least 30 of 42 random quality/inversion prompts per string-set family on the first attempt.

Practice log and completion audit

- [ ] 168 silent formations
- [ ] 168 shape forms
- [ ] 12 transfer cycles
- [ ] 12 quality cells
- [ ] 8 progressions
- [ ] 8 rhythm cells
- [ ] 8 lead fragments
- [ ] 2 capstones

Date	Set / root	Quality	Inversion	D/U	BPM	Weak voice / move	Next target

NEXT Level 54 uses CAGED as a practical chord, triad, root, arpeggio, and nearby-scale indexing system.
