Guitar Exercises - Section VI, Level 55

Diatonic major-key harmony, Roman numerals, progression families, and transposition

6 KEYS | 11 MODULES | 936 ATTACKS

The chord shapes from Levels 49-54 now become a harmonic language. Build a triad on every major-scale degree, label its quality with Roman numerals, group the chords by function, and move the same progression through several keys without changing its numerical identity.

1. Harmonize the scale

Stack alternate scale tones to produce I, ii, iii, IV, V, vi, and vii°.

2. Hear function

Tonic chords stabilize; predominant chords prepare; dominant chords create return pressure.

3. Transpose by number

Keep the Roman-numeral pattern fixed while the chord names, roots, and key signatures change.

Major-scale harmonization formula

```
Scale degree:  1    2    3    4    5    6    7
Roman numeral: I    ii   iii  IV   V    vi   vii°
Triad quality:  MAJ  min  min  MAJ  MAJ  min  dim
Function:       T    P    T    P    D    T    D

Major scale steps: W-W-H-W-W-W-H
Triad construction: take one scale note, skip one, take one, skip one, take one.
Example in C: C-E-G | D-F-A | E-G-B | F-A-C | G-B-D | A-C-E | B-D-F
```

Written workload

Module	Work
A - spelling	42 silent
B - six ladders	168
C-H - six families	576
I - voice leading	96
J - analysis	24 written
K - circle capstone	96
TOTAL	936

Session protocol

Choose one key family, one progression family, and one transposition command. Name the key, Roman numerals, function path, and chord qualities before playing. Start with blocked triads; add full open or barre chords only after the harmony is understood.

CASE RULE Uppercase numerals are major; lowercase numerals are minor; vii° is diminished.

Guitar Exercises - Section VI, Level 55

Module A - major-scale spelling, function families, and the circle of fifths

42 SILENT SPELLINGS | 6 PRACTICE KEYS

ROMAN NUMERALS PRESERVE FUNCTION WHEN THE CHORD NAMES CHANGE

Three function families

Family	Degrees	Job
Tonic	I, iii, vi	stability, home, relative-minor color
Predominant	ii, IV	moves away from tonic and prepares dominant
Dominant	V, vii°	maximum return pressure toward I

Major-scale quality sequence

```
Degree |1---2---3---4---5---6---7---|
Roman  |I---ii--iii-IV--V---vi--vii°|
Quality|M---m---m---M---M---m---dim-|
Stack  |135 246 357 461 572 613 724 |
```

The diminished triad contains 1-b3-b5 relative to its own root and normally leads toward I.

Six-key circle route used in this level: F -> C -> G -> D -> A -> E

Key	Signature	Scale	Relative minor
F	1 flat: Bb	F G A Bb C D E	D minor
C	no sharps or flats	C D E F G A B	A minor
G	1 sharp: F#	G A B C D E F#	E minor
D	2 sharps: F#, C#	D E F# G A B C#	B minor
A	3 sharps: F#, C#, G#	A B C# D E F# G#	F# minor
E	4 sharps: F#, C#, G#, D#	E F# G# A B C# D#	C# minor

Order of accidentals

```
Sharps: F C G D A E B
Flats:  B E A D G C F
```

Silent spelling command

For each practice key, say the seven scale notes, chord names, Roman numerals, qualities, and functions without the guitar. 6 keys x 7 degrees = 42 prompts.

Module K - circle-of-fifths transposition capstone

24 BARS | F-C-G-D-A-E | 96 ATTACKS

PLAY I-IV-V-I IN SIX ADJACENT CIRCLE KEYS WITHOUT STOPPING THE CLOCK

Each key occupies four bars. Play four quarter-note chord attacks per bar. Announce the next key during beat 4 of the current key's final I chord. The harmonic function remains T-P-D-T even while every chord name changes.

Bars 1-4: F major

Rom	I	IV	V	I
Chd	F	Bb	C	F
Func	T	P	D	T

Voicings: F barre | Bb barre | open C | F barre

16 attacks; say next key on beat 4 of final bar.

Bars 5-8: C major

Rom	I	IV	V	I
Chd	C	F	G	C
Func	T	P	D	T

Voicings: open C | F barre / triad | open G | open C

16 attacks; say next key on beat 4 of final bar.

Bars 9-12: G major

Rom	I	IV	V	I
Chd	G	C	D	G
Func	T	P	D	T

Voicings: open G | open C | open D | open G

16 attacks; say next key on beat 4 of final bar.

Bars 13-16: D major

Rom	I	IV	V	I
Chd	D	G	A	D
Func	T	P	D	T

Voicings: open D | open G | open A | open D

16 attacks; say next key on beat 4 of final bar.

Bars 17-20: A major

Rom	I	IV	V	I
Chd	A	D	E	A
Func	T	P	D	T

Voicings: open A | open D | open E | open A

16 attacks; say next key on beat 4 of final bar.

Bars 21-24: E major

Rom	I	IV	V	I
Chd	E	A	B	E
Func	T	P	D	T

Voicings: open E | open A | B barre | open E

16 attacks; say next key on beat 4 of final bar.

PASS 2 Use the printed nearest triads: blocked attack plus arpeggio per bar.

PASS 3 Anticipate IV and V on the & of 4 without moving the key boundary.

Guitar Exercises - Section VI, Level 55

Practice progression, error diagnosis, and functional ear training

THEORY -> FORMATION -> FUNCTION -> TRANSPOSITION

REPAIR THE FIRST LAYER THAT FAILS

Ten-phase practice progression

1. Say W-W-H-W-W-W-H.
2. Recite I-ii-iii-IV-V-vi-vii°.
3. Spell all seven triads in C and G.
4. Add D, A, E, and F key families.
5. Play every harmonized triad ladder.
6. Learn I-IV-V-I in all six keys.
7. Add the five remaining progression families.
8. Play the nearest-inversion voice-leading cells.
9. Complete the analysis and transposition page.
10. Perform the 24-bar circle capstone.

Error diagnosis

WRONG QUALITY	recite the fixed M-m-m-M-M-m-dim sequence
WRONG KEY NOTE	say the key signature before spelling the chord
ROMAN CASE ERROR	uppercase major; lowercase minor; ° diminished
FUNCTION BLUR	reduce to T-P-D-T and sustain one chord per bar
TRANSPOSE ERROR	keep numerals fixed; rebuild chord names from degree 1
TRIAD FRET SEARCH	name string set and inversion before forming
CAPSTONE STOP	loop the final I bar plus the next key's I bar

Functional ear-training loop

Play I for four beats, ii or IV for four beats, V or vii° for four beats, then I. Sing each root. Repeat with eyes closed and identify only the function family: tonic, predominant, dominant, tonic.

Pass	Material	Task
1	I-IV-V-I	sing roots and name T-P-D-T
2	I-vi-IV-V	hear vi as tonic-family color
3	ii-V-I-I	hear predominant-dominant-tonic
4	random key	identify function before chord name

Advancement rule

Add a key only after the current key can be spelled, formed, and analyzed without reference. Raise tempo after three clean cells. When transposition fails, return to numerals and rebuild chord names rather than shifting remembered shapes blindly.

NEXT: NATURAL-MINOR HARMONY AND MINOR-KEY PROGRESSIONS

ADVANCE AFTER THE NUMERALS, QUALITIES, FUNCTIONS, AND SHAPES AGREE

Mastery gate before Level 56

- [ ] Spell the major scale and all seven diatonic triads in C, G, D, A, E, and F.
- [ ] Recite I-ii-iii-IV-V-vi-vii° with the correct qualities and function families.
- [ ] Play all six harmonized triad ladders with blocked-plus-arpeggiated cells.
- [ ] Perform all six progression families in all six keys without changing the Roman-numeral order.
- [ ] Play nearest-inversion I-IV-V-I voice-leading cells in all six keys and audit each voice.
- [ ] Analyze the twelve printed progressions and complete the twelve transposition commands.
- [ ] Perform the 24-bar F-C-G-D-A-E capstone without stopping between keys.
- [ ] Meet the standard on two separate days, once with triads and once with full or partial rhythm voicings.

Completion audit

- [ ] 42 silent spellings
- [ ] 6 triad ladders
- [ ] 36 progression cells
- [ ] 6 voice-leading cells
- [ ] 12 analysis prompts
- [ ] 12 transpositions
- [ ] 24-bar capstone
- [ ] ear-function loop
