Guitar Exercises - Section VI, Level 58

Sixteenth-note rhythm guitar, syncopation, dead strokes, releases, and full-song comping

9 MODULES | 1018 CONTACTS

Levels 49-57 built the chord vocabulary. Level 58 turns it into continuous sixteenth-note rhythm guitar. The right hand maintains the 1-e-&-a motion while the left hand decides whether each stroke produces a pitched chord, a dead sound, a tie, a pressure release, or no string contact.

1. Keep the motor running

Downstrokes occur on numbers and ampersands; upstrokes occur on e and a. Air strokes remain part of the motion.

2. Separate contact from sound

A dead stroke is a deliberate string contact. A tie or air stroke creates no new attack. Do not confuse the three.

3. Phrase the full song

Different sections use different density, register, muting, and dynamics while the pulse and form remain continuous.

A - attack masks	128
B - dead strokes	84
C - ties / releases	40
D - syncopation	43
E - anticipations	142
F - funk patterns	68
G - progressions	188
H - texture / dynamics	116
I - song capstone	209
TOTAL	1018

Session protocol

Clap and air-strum every new pattern before adding a chord. Use partial voicings when full chords create unwanted strings. Record the right hand from the picking-side angle and verify that the motion continues through rests and ties.

SAFETY Keep the wrist loose, the pick shallow, and the forearm free of rigid sixteenth-note pumping. Stop if tension builds.

Attack-zone rule

Full open chords may use five or six strings. Funk and dead-stroke patterns usually work better with three- or four-string partials. Choose the smallest voicing that communicates the harmony.

Accent rule

Create an accent with velocity and timing, not by burying the pick deeper between the strings. The unaccented contacts must remain controlled and audible.

Guitar Exercises - Section VI, Level 58

Module A - one-beat sixteenth-note attack masks, Part 1

8 MASKS | 48 ATTACKS

REPEAT THE ONE-BEAT MASK ON ALL FOUR BEATS OF THE BAR

Air-strum the entire D-U-D-U path. Contact the strings only where P is printed. Begin on one muted string, then use an Em chord with minimum pressure and correct release.

Module B - dead-stroke and ghost-contact mechanics

8 PATTERNS | 84 CONTACTS

A DEAD STROKE TOUCHES THE STRINGS BUT PRODUCES NO IDENTIFIABLE CHORD PITCH

Release fretting pressure without removing the fingers, then strum through the intended partial-chord attack zone. Begin with three strings. Expand only when the mute remains dry and even.

B1. Alternating chord / ghost

Muting audit

No open string may ring through x. If one string remains pitched, reduce the number of strings in the voicing, flatten the fretting fingers slightly, or use the picking hand to mute the outer strings.

Module C - pressure releases and staccato control

4 CELLS | 19 CONTACTS

THE HAND STOPS THE CHORD WITHOUT LEAVING THE STRINGS

R marks a left-hand pressure release. The right hand continues the sixteenth-note path. Reapply pressure before the next P; do not lift the complete chord and rebuild it for every short attack.

Module C - ties across beats and barlines

4 CELLS | 21 CONTACTS

A TIE REMOVES THE NEW ATTACK BUT DOES NOT REMOVE THE SUBDIVISION

Continue the D-U-D-U air motion while the chord sustains. The most important test is the first attack after the tie: it must arrive on time without a shoulder cue or visible reset.

Module G - four-bar progression comping, Part 2

3 STUDIES | 100 CONTACTS

KEEP ONE GROOVE THROUGH ALL FOUR CHORDS; DO NOT RESET AT THE BARLINE

Each study uses one bar per chord. Play the pattern four times without stopping. The right hand remains identical while chord formation, attack zone, and muting change.

Module H - texture, register, dynamics, and bass/chord separation

4 STUDIES | 128 CONTACTS

THE GROOVE MAY STAY CONSTANT WHILE THE ARRANGEMENT CHANGES

Every study uses four bars and eight contacts per bar. Preserve the pattern exactly while changing only the printed texture variable. This separates arrangement choices from timing accuracy.

Module I - thirty-two-bar full-song rhythm capstone: form and texture map

32 BARS | INTRO / VERSE / PRE / CHORUS / BRIDGE / OUTRO

ONE COMPLETE TAKE; NO STOPPING BETWEEN SECTIONS

The capstone uses familiar open chords and five section-specific grooves. Memorize the form first. Speak the next section name during beat 4 of the final bar in the current section.

Section	Bars	Progression	Texture	Pattern contacts / bar
INTRO	4	G | D | Em | C	sustained open texture	4
VERSE A	8	G | D | Em | C | G | D | C | D	palm-muted 16th groove	8
PRE-CHORUS	4	Am | C | D | D	increase register and dynamics	6
CHORUS	8	G | C | Em | D | G | C | D | D	open, accented, full attack zone	8
BRIDGE	4	Em | C | G | D	half-time stop-time contrast	4
OUTRO	3	G | D | C	return to full groove	8

Form memory pass

Speak section names and chord names while air-strumming. Do not fret the guitar until all 32 bars can be counted without a correction.

Arrangement pass

Use open chords in intro and chorus, palm-muted partials in verse, rising register in pre-chorus, stop-time in bridge, and a single sustained final G.

CAPSTONE CONTACTS 209 notated string contacts; the sixteenth-note air motion continues through every section.

Five performance passes

- [ ] 1. Air-strum and speak every section/chord.
- [ ] 2. Muted strings only; reproduce all section grooves.
- [ ] 3. Chords with no dynamics; protect the form.
- [ ] 4. Add muting, register, accents, and section dynamics.
- [ ] 5. Record one uninterrupted take and score the audit below.

NO-STOP RULE A wrong chord does not stop the performance. Simplify to quarter notes and rejoin at the next barline.

NEXT: SECTION VII - ARPEGGIOS AND CHORD-TONE SOLOING

RHYTHM GUITAR IS COMPLETE WHEN THE GROOVE, CHORD, FORM, AND DYNAMIC SHAPE SURVIVE ONE TAKE

Ten-phase practice progression

- [ ] 1. Fifteen attack masks
- [ ] 2. Eight dead-stroke patterns
- [ ] 3. Release and tie cells
- [ ] 4. Eight syncopation patterns
- [ ] 5. Anticipated changes
- [ ] 6. Six funk grooves
- [ ] 7. Six progression studies
- [ ] 8. Four texture studies
- [ ] 9. Full-song section blocks
- [ ] 10. One uninterrupted capstone

Mastery gate

- [ ] 1-e-&-a motion never stops
- [ ] P / x / - / ~ are distinct
- [ ] dead strokes contain no pitch
- [ ] ties survive barlines
- [ ] eight anticipations land early
- [ ] six funk patterns stay relaxed
- [ ] progressions keep attack zones
- [ ] section textures remain distinct
- [ ] 32-bar form is memorized
- [ ] two clean recorded days

Section VI completion standard

Form and change open, barre, triad, CAGED, seventh-chord, and shell voicings; analyze major and minor harmony; transpose Roman-numeral progressions; comp major ii-V-I, minor iiø-V-i, and A blues; execute sixteenth-note syncopation, dead strokes, ties, releases, and anticipations; and perform the 32-bar capstone with stable form, muting, dynamics, and recovery on two separate days.
