Guitar Exercises - Section X, Level 75

Repertoire analysis, arrangement, cue-based changes, and complete-performance orchestration

60-BAR MASTER FORM | 1368 CONTACTS

Level 75 changes the unit of practice from an isolated technique to a complete performance. The player must analyze form, assign harmonic and rhythmic jobs, watch or hear cues, change texture on time, leave space for other parts, recover without stopping, and complete a 60-bar fictional repertoire study from count-in to final release.

ANALYZE

Know key, form, functions, cue points, and difficult transitions before playing.

ARRANGE

Choose register, density, articulation, dynamics, and role for every section.

PERFORM

Follow cues, preserve time, recover locally, and finish the complete form without restarting.

Master-form architecture

Section	Bars	Texture	Dynamic
Intro	4	clean high triads	mp
Verse A	8	palm-muted low register	p
Pre-Chorus	4	rising register	mp -> mf
Chorus	8	open attack / upper triads	f
Verse B	8	variation + fills	mp
Bridge	8	wide register / modulation cue	mf
Solo	8	lead; rhythm reduced	mf -> f
Final Chorus	8	full texture	f
Outro	4	decelerating density	f -> pp

Written workload

Module	Contacts
A	96
B	128
C	96
D	128
E	160
F	120
G	240
H	160
I	240
TOTAL	1368

Performance rule

A wrong note is a local error. Losing the bar count, missing a section cue, or stopping the performance is a structural error. Level 75 therefore scores continuity, cue response, texture contrast, and recovery alongside note accuracy.

Guitar Exercises - Section X, Level 75

Module A - form chart, harmonic map, and pre-performance analysis

FORM BEFORE FINGERS | 96 CONTACTS

MARK THE FORM BEFORE PLAYING THE FIRST NOTE

Sec	Bars	Chord sequence	Rhythm job	Dynamic	Role
Intro	4	Cmaj7 | Am7 | Dm7 | G7	whole-note swells	mp	clean high triads
Verse A	8	Cmaj7 | G/B | Am7 | Em7 | Fmaj7 | C/E | Dm7 | G7	8th-note partials	p	palm-muted low register
Pre-Chorus	4	Am7 | Em7 | Fmaj7 | G7	quarters -> 8ths	mp -> mf	rising register
Chorus	8	Cmaj7 | G7 | Am7 | Fmaj7 | Cmaj7 | G7 | Fmaj7 | G7	16th comping	f	open attack / upper triads
Verse B	8	Cmaj7 | G/B | Am7 | Em7 | Fmaj7 | C/E | Dm7 | G7	8th-note partials	mp	variation + fills
Bridge	8	Am7 | Fmaj7 | Cmaj7 | G7 | Am7 | Fmaj7 | D7 | G7	3+3+2 accents	mf	wide register / modulation cue
Solo	8	Dm7 | G7 | Cmaj7 | Cmaj7 | Am7 | D7 | Gmaj7 | G7	motif + chord targets	mf -> f	lead; rhythm reduced
Final Chorus	8	Cmaj7 | G7 | Am7 | Fmaj7 | Cmaj7 | G7 | Fmaj7 | G7	16th comping	f	full texture
Outro	4	Cmaj7 | Am7 | Dm7 | Cmaj7	quarters -> whole	f -> pp	decelerating density

Analysis commands

Circle every dominant chord. Box every new section. Mark repeated material. Write the highest-risk transition above the chart. Name the cue that starts the next section before touching the guitar.

96-contact audit

Play twelve eight-contact chord-function cells: tonic, predominant, dominant, tonic. Speak the function before each attack. The goal is to make the chart audible without relying on memorized finger patterns.

Guitar Exercises - Section X, Level 75

Module A - harmonic reduction and bass-motion awareness

12 CELLS | 96 CONTACTS

Verse skeleton

```
Cmaj7 | Am7 | Fmaj7 | G7
R  3  7  5 | R  3  7  5
```

Play roots first, then guide tones, then complete voicings.

Pre-chorus

```
Am7 | Em7 | Fmaj7 | G7
R  3  7  5 | R  3  7  5
```

Play roots first, then guide tones, then complete voicings.

Chorus

```
Cmaj7 | G7 | Am7 | Fmaj7
R  3  7  5 | R  3  7  5
```

Play roots first, then guide tones, then complete voicings.

Bridge A

```
Am7 | Fmaj7 | Cmaj7 | G7
R  3  7  5 | R  3  7  5
```

Play roots first, then guide tones, then complete voicings.

Bridge B

```
Am7 | Fmaj7 | D7 | G7
R  3  7  5 | R  3  7  5
```

Play roots first, then guide tones, then complete voicings.

Solo A

```
Dm7 | G7 | Cmaj7 | Cmaj7
R  3  7  5 | R  3  7  5
```

Play roots first, then guide tones, then complete voicings.

Solo B

```
Am7 | D7 | Gmaj7 | G7
R  3  7  5 | R  3  7  5
```

Play roots first, then guide tones, then complete voicings.

Outro

```
Cmaj7 | Am7 | Dm7 | Cmaj7
R  3  7  5 | R  3  7  5
```

Play roots first, then guide tones, then complete voicings.

Bass-motion pass: play only the lowest structural note of every measure. If the form becomes unclear, the arrangement is not yet ready for full texture.

Guitar Exercises - Section X, Level 75

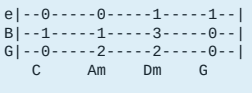

Module B - arrangement roles: rhythm, lead, support, and silence

8 ROLE CELLS | 128 CONTACTS

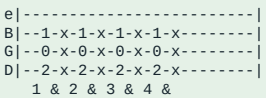

DO NOT PLAY THE SAME DENSITY IN EVERY SECTION

Role	Material	Best use	Constraint
Foundation	Roots + shell	Verse	Leave upper register open
Comping	Triads / 7th shells	Chorus	Support groove, avoid lead register
Counterline	2-4 note answer	Pre / Bridge	Answer vocal-space only
Lead	Motif + targets	Solo	Rhythm guitar reduces density
Silence	Rest / cue watch	Transitions	Prepare next entrance

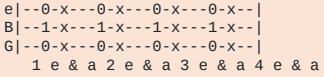

Clean-triad role

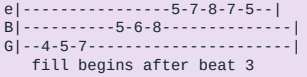

Muted-verse role

Open-chorus role

Fill-after-space role

Guitar Exercises - Section X, Level 75

Module B - density, register, and texture ladder

128 CONTACTS

CHANGE ONE ARRANGEMENT VARIABLE AT A TIME

Lvl	Voicing	Register	Dyn	Rhythm
1	single roots	low	p	whole notes
2	shell dyads	middle-low	mp	half notes
3	triads	middle	mf	quarters
4	partial 7ths	upper	mf	8ths
5	full comping	wide	f	16ths
6	lead + rests	upper	f -> mp	motif / space

Texture-ramp exercise

```
Bars 1-2   roots only
Bars 3-4   shell dyads
Bars 5-6   triads
Bars 7-8   partial seventh chords
Bars 9-10  full comping
Bars 11-12 lead answers with rests
```

Use Cmaj7-Am7-Dm7-G7. The tempo never changes. Only density and register change. Record the pass and verify that the form becomes larger without becoming louder by accident.

Guitar Exercises - Section X, Level 75

Module C - visual, count, and musical cue mechanics

12 CUE CELLS | 96 CONTACTS

THE CUE OCCURS BEFORE THE CHANGE; THE CHANGE OCCURS ON TIME

Cue	Example	Preparation	Execution
Visual	head nod / hand lift	look on beat 3	change on next bar 1
Count	spoken 4 / 2-bar count	hear while playing	do not slow to listen
Musical	drum fill / held chord	recognize pattern	prepare destination

Cue cell 1: old section -> new section

```
Count|1---2---3---4---|
Play |P---P---P---P---|
Look |------------>---|
Move |--------------->|
```

Keep playing while the eyes or ears receive the cue. The fretting hand begins moving only after the final old-section attack.

Cue cell 2: old section -> new section

```
Count|1---2---3---4---|
Play |P---P---P---P---|
Look |------------>---|
Move |--------------->|
```

Keep playing while the eyes or ears receive the cue. The fretting hand begins moving only after the final old-section attack.

Cue cell 3: old section -> new section

```
Count|1---2---3---4---|
Play |P---P---P---P---|
Look |------------>---|
Move |--------------->|
```

Keep playing while the eyes or ears receive the cue. The fretting hand begins moving only after the final old-section attack.

Cue cell 4: old section -> new section

```
Count|1---2---3---4---|
Play |P---P---P---P---|
Look |------------>---|
Move |--------------->|
```

Keep playing while the eyes or ears receive the cue. The fretting hand begins moving only after the final old-section attack.

Guitar Exercises - Section X, Level 75

Module C - chained section changes and no-look recovery

96 CONTACTS

PRACTICE THE TRANSITION, NOT JUST THE SECTIONS

Transition	Last chord	First chord	Cue	Task
Intro -> Verse	G7	Cmaj7	visual	4 old attacks + 4 new attacks
Verse -> Pre	G7	Am7	2-bar count	4 old attacks + 4 new attacks
Pre -> Chorus	G7	Cmaj7	drum fill	4 old attacks + 4 new attacks
Chorus -> Verse	G7	Cmaj7	held vocal note	4 old attacks + 4 new attacks
Verse -> Bridge	G7	Am7	visual + count	4 old attacks + 4 new attacks
Bridge -> Solo	G7	Dm7	4-count	4 old attacks + 4 new attacks
Solo -> Final Chorus	G7	Cmaj7	band hit	4 old attacks + 4 new attacks
Final Chorus -> Outro	G7	Cmaj7	double nod	4 old attacks + 4 new attacks

No-look recovery drill

Have a partner or random timer call one of the eight destination sections while you maintain quarter-note Cmaj7. On the next barline, enter the requested section using its first chord and texture. If the cue is missed, continue the current bar and join one bar later; do not stop.

```
CALL: VERSE  -> Cmaj7 muted eighths
CALL: CHORUS -> Cmaj7 open sixteenths
CALL: BRIDGE -> Am7 3+3+2 accents
CALL: SOLO   -> Dm7 sparse target phrase
```

Guitar Exercises - Section X, Level 75

Module D - fill placement, negative space, and re-entry

16 FILL CELLS | 128 CONTACTS

A FILL MUST END BEFORE THE NEXT STRUCTURAL ATTACK

Start	Available space	Risk	Rule
Beat 1	4-beat fill	high risk	land on next section beat 1
Beat 2	3-beat fill	medium	land on next section beat 1
Beat 3	2-beat fill	recommended	land on next section beat 1
Beat 4	1-beat fill	safe	land on next section beat 1

Fill 1: chord tone -> connector -> target

```
e|----------------5-7-8-7-5--|
B|----------5-6-8--------------|
G|--4-5-7----------------------|
   fill begins after beat 3
```

Resolve to C on next bar 1.

Fill 2: chord tone -> connector -> target

```
e|----------------5-7-8-7-5--|
B|----------5-6-8--------------|
G|--4-5-7----------------------|
   fill begins after beat 3
```

Resolve to A on next bar 1.

Fill 3: chord tone -> connector -> target

```
e|----------------5-7-8-7-5--|
B|----------5-6-8--------------|
G|--4-5-7----------------------|
   fill begins after beat 3
```

Resolve to D on next bar 1.

Fill 4: chord tone -> connector -> target

```
e|----------------5-7-8-7-5--|
B|----------5-6-8--------------|
G|--4-5-7----------------------|
   fill begins after beat 3
```

Resolve to G on next bar 1.

Guitar Exercises - Section X, Level 75

Module D - section-to-section texture contrast

128 CONTACTS

CONTRAST MUST BE AUDIBLE EVEN WITH THE SAME CHORD PROGRESSION

Change	Old texture	New texture	Dynamic	Audit
Verse -> Chorus	muted 8ths	open 16ths	p -> f	same tempo
Chorus -> Verse	wide triads	low partials	f -> mp	same tempo
Pre -> Chorus	rising quarters	full groove	crescendo	same tempo
Bridge -> Solo	3+3+2 comp	sparse lead	mf -> space	same tempo
Solo -> Chorus	lead register	rhythm register	f -> f	same tempo

Two-bar contrast cell

```
BAR 1 - VERSE
Count|1 & 2 & 3 & 4 &|
Play |P x P x P x P x|

BAR 2 - CHORUS
Count|1e&a2e&a3e&a4e&a|
Play |P-x-P-x-P-x-P-x-|
```

Repeat the same Cmaj7 harmony while changing only attack zone, muting, subdivision, and dynamics. Then reverse the order without inserting a setup pause.

Guitar Exercises - Section X, Level 75

Module E - dynamic contour and register orchestration

20 CELLS | 160 CONTACTS

DYNAMICS ARE A FORM PARAMETER, NOT AN AFTERTHOUGHT

Contour	4-bar map	Best use	Constraint
Flat	mp mp mp mp	diagnostic only	tempo and note count fixed
Ramp up	p mp mf f	pre-chorus	tempo and note count fixed
Ramp down	f mf mp p	outro	tempo and note count fixed
Arch	p mf f mp	solo phrase	tempo and note count fixed
Terrace	p p f f	section contrast	tempo and note count fixed
Echo	f p f p	call/response	tempo and note count fixed

Register orchestration ladder

```
Low:      roots / power-chord shell
Mid-low:  seventh-chord shell
Middle:   three-note triad
Upper:    triad inversion / dyad
High:     lead answer / motif
```

Play Cmaj7-Am7-Dm7-G7 once in each register. Then assign one register to Verse, Chorus, Bridge, and Solo so neighboring sections do not occupy the same sonic space.

Guitar Exercises - Section X, Level 75

Module E - complete 60-bar arrangement map

160 CONTACTS

WRITE THE ARRANGEMENT BEFORE THE FULL PERFORMANCE PASS

Section	Bars	Register	Density	Articulation	Cue out
Intro	4	upper	1/bar	swells	beat-4 nod
Verse A	8	low	8/bar	palm mute	2-bar count
Pre-Chorus	4	mid -> upper	4-8/bar	open gradually	drum fill
Chorus	8	wide	8-12/bar	open + dead strokes	held G7
Verse B	8	low/mid	8/bar	mute + fills	visual
Bridge	8	wide	6-8/bar	accent groups	4-count
Solo	8	lead	4-8/bar	legato/bends	band hit
Final Chorus	8	wide	8-12/bar	open	double nod
Outro	4	upper -> low	4 -> 1/bar	let ring	final release

160-contact arrangement audit: play twenty eight-contact cells drawn from the chart. Every cell must begin with the section-appropriate register and end with the correct cue behavior. Do not practice the notes separately from the arrangement decision.

Guitar Exercises - Section X, Level 75

Module F - transition-risk matrix and targeted rehearsal

15 RISK CELLS | 120 CONTACTS

REHEARSE THE MOST EXPENSIVE FAILURE POINTS FIRST

Transition	Why risky	Risk	Repair
Verse -> Pre	texture + chord	high	loop last bar + first bar
Pre -> Chorus	density + dynamic	high	loop last bar + first bar
Chorus -> Verse	muting reset	medium	loop last bar + first bar
Verse -> Bridge	meter/accent feel	high	loop last bar + first bar
Bridge -> Solo	role change	high	loop last bar + first bar
Solo -> Chorus	register + role	high	loop last bar + first bar

Eight-contact transition loop

```
Old section: 4 structural attacks
Cue:         received during attacks 3-4
New section: 4 destination attacks

Repeat x 4 without extra count-in.
Then embed inside 4 bars before + 4 bars after.
```

A transition is passed only when the first destination attack has the correct chord, register, articulation, and dynamic. Correct pitch with the wrong texture is still a missed section change.

Guitar Exercises - Section X, Level 75

Module F - count-in, click reduction, and internal-time rehearsal

120 CONTACTS

REMOVE EXTERNAL TIME SUPPORT IN STAGES

Pass	Click	Primary test	Failure response
Pass 1	click every quarter	establish form	simplify rhythm, do not stop
Pass 2	click beats 2 and 4	backbeat stability	simplify rhythm, do not stop
Pass 3	click beat 1 only	barline stability	simplify rhythm, do not stop
Pass 4	click every 2 bars	phrase stability	simplify rhythm, do not stop
Pass 5	click section starts only	form memory	simplify rhythm, do not stop
Pass 6	no click	record and compare	simplify rhythm, do not stop

Count-in protocol

```
Bar -2: listen only

Bar -1: count 1 2 3 4

Bar 1 : enter on planned attack

Section changes: internal count continues

Final bar: release together on planned subdivision
```

Do not use the count-in to discover the tempo. Hear the tempo internally before the count begins. The first attack should confirm an already-established pulse.

Guitar Exercises - Section X, Level 75

Module G - complete-performance rehearsal ladder

240 CONTACTS

ADD COMPLEXITY ONLY AFTER THE FORM SURVIVES THE PREVIOUS PASS

Pass	Material	Primary test	Advance when
1	Speak chart + tap pulse	form	no structural errors
2	Roots only	harmony	no structural errors
3	Shells / triads	voice leading	no structural errors
4	Written rhythm textures	groove	no structural errors
5	Cues + fills	transitions	no structural errors
6	Dynamics + register	arrangement	no structural errors
7	Lead / rhythm role changes	orchestration	no structural errors

Three-error hierarchy

1. Structural error: lost form, missed cue, stopped performance. Repair immediately. 2. Functional error: wrong chord quality, wrong section texture, missed target. Simplify until function returns. 3. Cosmetic error: weak articulation or imperfect note. Continue and review after the take.

The rehearsal ladder is intentionally biased toward finishing. A complete imperfect take produces more useful diagnostic information than repeatedly restarting the first sixteen bars.

Guitar Exercises - Section X, Level 75

Module G - rhythm-to-lead and lead-to-rhythm handoffs

240 CONTACTS

CHANGE ROLE WITHOUT CHANGING THE CLOCK

Handoff	Location	Preparation	Destination
Rhythm -> lead	G7 bar 8	leave beat 4 open	lead enters bar 9
Lead -> rhythm	Cmaj7 bar 4	resolve by beat 3	comp enters next bar
Low -> upper	pre-chorus	guide-tone climb	upper triad on chorus 1
Upper -> low	chorus end	sustain top voice	low root on verse 1
Dense -> sparse	bridge -> solo	final accent	rest then motif
Sparse -> dense	solo -> chorus	target on beat 3	full groove barline

Handoff cell

```
BAR 1 RHYTHM: P---P---P---P---
BAR 2 RHYTHM: P---P---P-------
BAR 3 LEAD:   ----C-E-G-B-A-G--
BAR 4 LEAD:   E-D-C-----------
```

The empty space at the end of the rhythm part is intentional preparation, not missing material. Reverse the cell by ending the lead phrase early and entering the rhythm texture exactly on the next bar 1.

Guitar Exercises - Section X, Level 75

Master form - Intro through Pre-Chorus

MODULE H | 160 CONTACTS TOTAL

PLAY THE SECTION JOB, WATCH THE CUE, AND CONTINUE WITHOUT A RESET

Intro - 4 bars - mp

Chords: Cmaj7 | Am7 | Dm7 | G7

Rhythm: whole-note swells. Texture: clean high triads.

Cue out: beat-4 visual cue.

Verse A - 8 bars - p

Chords: Cmaj7 | G/B | Am7 | Em7 | Fmaj7 | C/E | Dm7 | G7

Rhythm: 8th-note partials. Texture: palm-muted low register.

Cue out: two-bar count into Pre.

Pre-Chorus - 4 bars - mp -> mf

Chords: Am7 | Em7 | Fmaj7 | G7

Rhythm: quarters -> 8ths. Texture: rising register.

Cue out: drum-fill cue.

Audit: name the next section during the current section, not after it ends. The hands should arrive because the form was anticipated, not because the previous sound stopped.

Guitar Exercises - Section X, Level 75

Master form - Chorus through Bridge

60-BAR PERFORMANCE MAP

PLAY THE SECTION JOB, WATCH THE CUE, AND CONTINUE WITHOUT A RESET

Chorus - 8 bars - f

Chords: Cmaj7 | G7 | Am7 | Fmaj7 | Cmaj7 | G7 | Fmaj7 | G7

Rhythm: 16th comping. Texture: open attack / upper triads.

Cue out: held G7 cue.

Verse B - 8 bars - mp

Chords: Cmaj7 | G/B | Am7 | Em7 | Fmaj7 | C/E | Dm7 | G7

Rhythm: 8th-note partials. Texture: variation + fills.

Cue out: visual cue into Bridge.

Bridge - 8 bars - mf

Chords: Am7 | Fmaj7 | Cmaj7 | G7 | Am7 | Fmaj7 | D7 | G7

Rhythm: 3+3+2 accents. Texture: wide register / modulation cue.

Cue out: four-count into Solo.

Audit: name the next section during the current section, not after it ends. The hands should arrive because the form was anticipated, not because the previous sound stopped.

Guitar Exercises - Section X, Level 75

Master form - Solo through Outro

60-BAR PERFORMANCE MAP

PLAY THE SECTION JOB, WATCH THE CUE, AND CONTINUE WITHOUT A RESET

Solo - 8 bars - mf -> f

Chords: Dm7 | G7 | Cmaj7 | Cmaj7 | Am7 | D7 | Gmaj7 | G7

Rhythm: motif + chord targets. Texture: lead; rhythm reduced.

Cue out: band hit into Final Chorus.

Final Chorus - 8 bars - f

Chords: Cmaj7 | G7 | Am7 | Fmaj7 | Cmaj7 | G7 | Fmaj7 | G7

Rhythm: 16th comping. Texture: full texture.

Cue out: double nod into Outro.

Outro - 4 bars - f -> pp

Chords: Cmaj7 | Am7 | Dm7 | Cmaj7

Rhythm: quarters -> whole. Texture: decelerating density.

Cue out: final release cue.

Audit: name the next section during the current section, not after it ends. The hands should arrive because the form was anticipated, not because the previous sound stopped.

Guitar Exercises - Section X, Level 75

Module I - performance recovery, dropped-bar repair, and cue triage

240 CONTACTS

RECOVER THE PERFORMANCE; DO NOT RE-LITIGATE THE MISTAKE

Failure	Immediate action	Deadline	Priority
Wrong note	nearest chord tone	same beat	
Wrong chord	shell of active chord	next beat	
Missed cue	stay current texture	join next bar	
Lost subdivision	quarter notes	keep bar count	
Lost bar count	listen for harmonic landmark	rejoin at section boundary	
Broken string / gear	mute / simplify	preserve ensemble time	
Lead phrase overrun	stop phrase	enter rhythm next bar	

Recovery ladder

```
1. KEEP PULSE
2. FIND ACTIVE BAR
3. PLAY ROOT OR SHELL
4. FIND NEXT SECTION LANDMARK
5. RESTORE TEXTURE
6. REVIEW ONLY AFTER TAKE ENDS
```

Randomize one failure every eight bars during rehearsal. The exercise is passed when the injected error changes less than one measure of the performance.

Guitar Exercises - Section X, Level 75

Level 75 capstone, scoring rubric, and Section X checkpoint

ONE COMPLETE 60-BAR TAKE

COUNT IN ONCE. FINISH ONCE. SCORE AFTERWARD.

Five capstone passes

1. Chart + roots only
2. Full rhythm arrangement
3. Cues hidden / randomized
4. Add fills and role handoffs
5. Record complete performance

Scoring - 0, 1, or 2 each

Form / bar count

Chord function

Rhythmic continuity

Cue response

Texture contrast

Dynamic shape

Role handoff

Recovery

Ending / release

Passing standard

Score at least 15 of 18 on two separate days, with no zero in form/bar count, cue response, rhythmic continuity, or recovery. A take may contain wrong notes and still pass if the performance architecture remains intact.

Record the final pass. Review it once without the guitar and mark only structural events: section entrances, cue timing, texture changes, dynamic contour, recovery, and final release.

Next level

Level 76 will extend this performance framework into transcription and ear-led repertoire work: hearing form, bass motion, chord quality, rhythmic cells, melodic targets, and reconstructing a complete arrangement from audio rather than from a supplied chart.
