Scale Exercises - Section IV, Level 37

A Major Pentatonic I-IV-V chord-tone targeting and voice leading

FIXED KEY: A | FIVE POSITIONS | CHORDS: A - D - E

Keep the five-note map fixed, but make every chord change audible. **Hear the harmony, land on a strong target, fill with the remaining pentatonic notes, and resolve before the next bar.**

1. Hear the active chord

A major, D major, and E major do not give the same function to the same five notes.

2. Land on a strong target

I: A, C#, E. IV: F#, A. V: E, B. Put one of these on the chord change.

3. Fill, then resolve

Use color tones between targets. Do not let C# over D or A over E become an accidental resting point.

Worked overview - Position 1, one quarter note per beat

Progression: **| A | D | E | A |**. The first note of every bar is the printed target.

```
Nte|A---B---C#--E---|F#--E---C#--A---|E---F#--B---E---|C#--B---A---A---|
Rol|>R--9---3---5---|>3--9---M7--5---|>R--9---5---R---|>3--9---R---R---|
e  |----------------|----------------|--------7-------|----------------|
B  |------------5---|7---5-----------|5---7-------5---|----------------|
G  |----4---6-------|--------6-------|----------------|6---4-----------|
D  |7---------------|------------7---|----------------|--------7---7---|
A  |----------------|----------------|----------------|----------------|
E  |----------------|----------------|----------------|----------------|
```

The bar may contain color tones; only the beat-1 landing is mandatory at first.

Session protocol

1. Say the A, D, and E triads.
2. Play one target cell per chord.
3. Hold one voice-leading route.
4. Add one four-bar phrase.
5. Complete D* and G#* only after core targets.
6. Play the 12-bar chorus.
7. Create one new fill without moving the target.

Core-workout count and harmonic boundary

496 sounding tones: 168 target-cell notes, 60 voice-leading tones, 160 phrase notes, 60 chord-completion notes, and a 48-note model chorus. The core target pool remains A-B-C#-E-F#.

IMPORTANT - D over the IV chord and G# over the V chord are temporary chord-completion tones, not additions to the A-major-pentatonic formula.

Level 37 - Chord-Role Matrix and Target Atlas

The same five notes change function when the chord changes.

A-major-pentatonic note	Over I - A major	Over IV - D major	Over V - E major	Landing priority
A	Root	5th	11 / sus4	Strong on I and IV; tension on V
B	9th	13th	5th	Strong on V
C#	3rd	Major 7	13th	Strong on I; tension on IV

Do not confuse color with arrival

C# over D is a major-7 color. A over E is an 11/sus4 color. Both may sound good in motion, but resolve them deliberately before treating them as a downbeat endpoint.

Two completion tones

D completes the IV chord root. G# completes the V chord third. Learn the core pentatonic targets first; add these notes only while the supporting chord is sounding.

Level 37 - P1 Chord-Target Cells

ROOT FRAME - FRETS 4-7 - play every strong target in the frame.

P1: ROOT FRAME - FRETS 4-7 Each cell ascends through the printed target set, repeats the top target, and returns. Every cell is even.

I - A MAJOR - 14-NOTE TARGET CELL

Complete triad available: root, third, fifth.

D-start and U-start; one note per click, then eighth notes.

Level 37 - Nearest-Target Voice Leading

Hold the harmony with four notes before adding fills: | A | D | E | A |.

Pass 1: hold each landing for one full bar. **Pass 2:** add two eighth-note pickup notes before the next target. **Pass 3:** move the route to another octave without changing note names or roles.

Do not decorate a route until the chord change is audible with one sustained note per bar.

Level 37 - Four-Bar Target Phrases, Positions 1-2

Eight eighth notes per bar. The role row marks each beat-1 target with >.

Play straight before adding articulation. The harmony, not the ornament, determines the landing.

Level-36 articulation overlay - one event per bar at first

Play every phrase straight once. On the second pass, add only the printed category while keeping the beat-1 target and the bar length unchanged.

Bar	Allowed first overlay	Harmony safeguard
A	One hammer/pull pair, slide, bend, or root vibrato	Do not move the beat-1 A/C#/E target.
D	Hammer/pull or slide into F# or A	Do not bend C# and mistake the major-7 color for a target.
E	Hammer/pull or slide into E or B	Resolve A(11) before the bar becomes a resting point.
A	End with A, C#, or E; vibrato after pitch is stable	Leave space after the final resolution.

Third pass: remove one fill entirely. A silent half-bar is valid phrasing if the next target remains clear.

Level 37 - Chord-Completion Tones

Add D over IV and G# over V after the core pentatonic targets are secure.

An asterisk marks a note outside A major pentatonic. These notes complete the harmony; they do not change the five-note scale formula.

Position	D root choices for IV	G# third choices for V
P1	A5, G7	E4, D6, e4
P2	G7, E10, e10	D6, B9
P3	E10, D12, e10	A11, B9
P4	D12, B15	A11, G13
P5	B15, D12	E16, e16, G13

Two-pass rule

Pass 1 - pentatonic only: replace D* with F# or A; replace G#* with E or B.
Pass 2 - completed harmony: restore D* and G#* exactly on their supporting chords. Compare how clearly the chord quality appears.

Level 37 - 12-Bar I-IV-V Target Circuit

Use the chord chart as a landing schedule, not as permission to fill every subdivision.

Bar	Chord	Strong target choices	Suggested frame	Model beat 1
1	A	A / C# / E	P1	A
2	A	A / C# / E	P1	C#
3	A	A / C# / E	P2	E
4	A	A / C# / E	P2	A

Bar	Chord	Strong target choices	Suggested frame	Model beat 1
5	D	F# / A; D* optional	P3	D*
6	D	F# / A	P3	A
7	A	A / C# / E	P4	C#
8	A	A / C# / E	P4	A

Bar	Chord	Strong target choices	Suggested frame	Model beat 1
9	E	E / B; G#* optional	P5	G#*
10	D	F# / A	P4	F#
11	A	A / C# / E	P3	E
12	E	E / B; G#* optional	P1	B

Three circuit passes

1. Target only — One whole note per bar. No fills.

2. Quarter-note frame — Four notes per bar; beat 1 remains the target.

3. Free fill — Choose any rhythm, but sing the next target before the bar changes.

Space and recovery rules

Leave beat 4 empty on the first improvisation pass. After a missed target, stop filling and hold the next printed landing. A clean whole note repairs the harmony faster than another scale run.

Optional test: record the target-only pass without a backing track. The chord sequence should still be inferable from note choice and timing.

Level 37 - Model 12-Bar Chorus

Four quarter notes per bar. The role row marks each beat-1 target with >.

Play the written chorus first. Then keep only its beat-1 targets and replace beats 2-4 with your own fills. D* and G#* are the two chord-completion tones.

Model-to-improvisation conversion

1. Play the written 48 notes. 2. Replace beats 2-4 while keeping all twelve beat-1 targets. 3. Replace six targets with another strong target from the same chord. 4. Create a second chorus with at least two bars of deliberate silence.

Level 37 - Practice Progression, Mastery Gate, and Log

Harmony must remain audible after the written material is removed.

Eight-phase practice progression

1. Speak the A, D, and E triads plus the role matrix.
2. Play one target cell for each chord in Position 1.
3. Complete all fifteen target cells with both pick starts.
4. Hold all three voice-leading routes in every position.
5. Play the five written phrases; audit every beat-1 landing.
6. Add one Level-36 articulation per bar.
7. Add D* and G#* through the completion cadences.
8. Play the model chorus; replace fills without moving targets.

Error diagnosis

SCALE-RUN AUTOPILOT	Play one whole-note target per bar.
WEAK CHANGE	Sing the next target before the bar arrives.
C# OVER D	Resolve major-7 tension immediately.
A OVER E	Resolve 11/sus4 tension to G#*, B, or E.
FRET SEARCH	Name string and fret before moving.
OVERFILLED BAR	Leave beat 4 empty.
LOST PULSE	Remove articulation; restore target timing.

Mastery gate before Level 38

Identify the role of every A-major-pentatonic note over A, D, and E; play all fifteen target cells with both pick starts; perform all three voice-leading routes in all five positions; land every written phrase target on beat 1; use D and G# only over their supporting chords; complete the 12-bar chorus on two separate days; and improvise one new chorus whose changes remain audible without a backing track.

Date	Focus	Tempo	Targets clean?	Weak chord / position	Next target

NEXT - LEVEL 38: MAJOR-PENTATONIC PHRASING AND IMPROVISATION SYNTHESIS

Combine five positions, horizontal movement, articulation, and I-IV-V targets into call-and-response phrases and controlled free choruses.
