Scale Exercises - Section V, Level 39

F# minor pentatonic relative-minor re-centering: same five notes, new tonic

FIXED NOTES: A B C# E F# | NEW TONIC: F#

Do not learn a new box. Keep the complete A-major-pentatonic neck map from Levels 30-38, rename every note from the viewpoint of F# minor, and make F# sound like home through drone, accent, phrase ending, and repetition.

1. Preserve the pitch pool

A major pentatonic and F# minor pentatonic use A, B, C#, E, and F#. No new fret is added.

2. Rename every function

A changes from root to b3. F# changes from 6 to root. The same sound now answers a different tonic.

3. Re-center the phrase

Use an F# drone, accent F#, begin or end on F#, and let the listener hear minor without changing the five notes.

Worked overview - same notes, different gravity

The fretboard stays fixed; only the tonal hierarchy changes.

Pitch	A-major job	F#-minor job
A	1 - tonic	b3 - minor color
B	2 - open color	4 - suspended color
C#	3 - major identity	5 - stable chord tone
E	5 - stable chord tone	b7 - minor / modal color
F#	6 - color tone	1 - new tonic

Session protocol

1. Play one phrase over an A drone.
2. Replay it unchanged over an F# drone.
3. Say both degree names while fretting.
4. Locate the nearest F# root in every box.
5. Accent A, then accent F# on the same line.
6. Give one call two different cadences.
7. Finish with the no-drone ear test.

Core-workout count and boundary

462 written sounding tones: 80 drone-comparison tones, 120 dual-degree box tones, 82 root-to-root tones, 48 accent-relocation tones, 60 two-cadence tones, 32 tonic-pivot tones, and 40 ear-test tones. All notes remain inside the shared A-major / F#-minor pentatonic pitch pool.

Level 39 - Dual-Degree Map and F# Root Atlas

A MAJOR: 1 2 3 5 6 | F# MINOR: 1 b3 4 5 b7

Keep the Level 34 position labels; change the tonal job of every pitch.

Pitch	A-major degree	A-major hearing	F#-minor degree	F#-minor hearing
A	1	tonic / resolution	b3	minor identity
B	2	open extension	4	suspended motion
C#	3	major identity	5	stable chord tone
E	5	stable chord tone	b7	minor / modal color
F#	6	upper color	1	tonic / resolution

P5 becomes the tonic frame

The box numbers do not change, but P5 now begins on F#. Practice P5 first when your ear keeps pulling the phrases back toward A.

Position	Fret span	A-major starting role	F#-minor starting role	F# roots inside frame
P1	4-7	1 (A)	b3 (A)	D4, B7
P2	6-10	2 (B)	4 (B)	A9, B7
P3	9-12	3 (C#)	5 (C#)	A9, G11
P4	11-14	5 (E)	b7 (E)	E14, G11, e14
P5	14-17	6 (F#)	1 (F#)	E14, D16, e14

Do not renumber the boxes

P1-P5 remain the established Level 34 neck-order labels. The new lesson is tonal center, not a competing box-number system.

String	A roots from Level 34	F# roots for Level 39
Low E	5, 17	14
A	12	9
D	7	4, 16
G	14	11
B	10	7
High e	5, 17	14

Root-location rule

Before every phrase, point to the nearest F# root. After the phrase, sing F# without touching the guitar. Then verify it on the instrument.

Level 39 - Module A: Drone Comparison

5 PHRASES x 8 NOTES x 2 DRONES = 80 TONES

Play each eight-note phrase twice with identical fingering, rhythm, dynamics, and articulation.

Use a sustained A note first, then a sustained F# note. Do not change the phrase. Listen for C# changing from the major third of A to the fifth of F#, A changing from tonic to b3, and F# changing from 6 to tonic.

P1 - unchanged pitch phrase

This is the strongest tonic-reset exercise in Level 39. Use it whenever A still sounds more final than F#.

Level 39 - Module D: Accent Relocation

P5 ASCENDING LINE | 4 PASSES x 12 NOTES = 48

The same twelve fretted notes can imply different centers when the accents move.

Shared twelve-note line across P5

A and F# each appear three times. The fret sequence remains identical in every pass.

```
Nte|F#--A---B---C#--E---F#--A---B---C#--E---F#--A---|
AMj|6---1---2---3---5---6---1---2---3---5---6---1---|
F#m|1---b3--4---5---b7--1---b3--4---5---b7--1---b3--|

  G|-----------------------14--16------------------|
  D|---------------14--16--------------------------|
  A|--------14--16---------------------------------|
  E|14--17-----------------------------------------|
```

Do not lengthen the accented note. Accent means a controlled increase in attack and weight, not a rhythmic distortion.

Pass 1 - A center

A drone. Accent every A. Say 1 on A and 6 on F#. Let the line feel like major-pentatonic motion.

Pass 2 - F# center

F# drone. Accent every F#. Say 1 on F# and b3 on A. Let the same line feel minor-centered.

Pass 3 - remove accents

Keep the A drone but remove overt accents. Preserve the A-centered hearing through internal prediction.

Pass 4 - remove accents

Keep the F# drone but remove overt accents. The ear should still anticipate F# as the resting point.

AUDIT: record Pass 1 and Pass 2. The notes should match exactly; only the tonal gravity should change.

Level 39 - Module E: Same Lick, Two Cadences

5 POSITIONS x 2 CADENCES x 6 NOTES = 60

Each pair shares the first four notes. Only the last two notes decide whether A or F# sounds final.

A-major cadence: B-C#-E-C#-B-A. F#-minor cadence: B-C#-E-C#-A-F#. Play the pair back to back, then ask a partner to call the destination at the last possible moment.

P1 - common seed, alternate destination

First four tones remain B-C#-E-C#.

Level 39 - Module F: Two-Bar Tonic Pivot Study

8 BARS x 4 TONES = 32 NOTES

Alternate two bars centered on A with two bars centered on F# while preserving one pitch pool.

Use quarter notes first. Later use swung eighth-note pickups into bars 3, 5, and 7 without changing the target center.

Version 1 - drones

Bars 1-2 and 5-6 over A. Bars 3-4 and 7-8 over F#. Let the backing note perform the first re-centering.

Version 2 - no drone

Remove the drones. Preserve the center using only accents and the final note of each two-bar block.

Version 3 - delayed pivot

Keep the old tonic in your ear through beat 1 of the new block, then make the new tonic clear by the final beat.

COUNT THE BAR LINES: a tonal pivot that destroys the pulse is not yet under control.

Level 39 - Module G: Random-Center Ear Test

8 CARDS x 5 NOTES = 40 TONES

Play the cards without a drone. Decide whether each phrase presents A or F# as the more convincing home note.

Cover the answer key. Play each card twice: first exactly as written, then repeat its final note and hold it for two beats. Name the center before uncovering the answer. A partner can randomize the card order.

Answer key - cover before playing

A: A-centered B: F#-centered C: A-centered D: F#-centered E: A-centered F: F#-centered G: A-centered H: F#-centered

Hard mode: a partner plays the card while you face away; identify the center from sound alone.

Level 39 - Mastery Gate and Practice Log

SECTION V - RELATIVE-MINOR RE-CENTERING

Advance only when the note map stays fixed and the perceived tonic can change on command.

Eight-phase practice progression

1. Memorize the dual-degree identity table.
2. Locate every F# root without playing a scale.
3. Complete all five drone-comparison phrases.
4. Read the five vertical boxes in both degree systems.
5. Play all root-to-root cells with both pick starts.
6. Move the accents from A to F# without changing rhythm.
7. Perform every two-cadence pair and the eight-bar pivot.
8. Complete the no-drone ear test and record one free phrase.

Error diagnosis and repair

A STILL SOUNDS LIKE HOME
Begin in P5, hold an F# drone, and play only root-to-root cells for one session.

WRONG DEGREE NAME
Stop the pick. Point to the note and say both jobs: A-major role first, F#-minor role second.

ACCENT CHANGES THE RHYTHM
Clap the twelve-note line, then add accents without changing note length.

CADENCE FEELS ADDED ON
Loop the final two notes alone, then attach only the last two notes of the shared seed.

PIVOT LOSES THE BAR
Use one note per beat and count aloud through every two-bar boundary.

Mastery gate before Level 40

Name both degree identities for all five pitches; locate all seven printed F# roots; play the five drone phrases unchanged over both drones; complete every root-to-root cell with D-start and U-start; make both cadences convincing in all five positions; perform the eight-bar pivot without losing time; score at least 7 of 8 on the ear test twice; and record one 30-second phrase that clearly resolves to F# without using any note outside the shared five-note set.

Date	Focus	Drone / no drone	D/U	BPM	Clean?	Center or error note	Next target

Next: Level 40 - F# Minor Pentatonic Harmony and Five-Position Phrasing

Apply the re-centered pitch pool to F#m, A, E, and D harmony; target chord tones while keeping F# as the governing tonic.
