Scale Exercises - Section V, Level 40

F# minor pentatonic harmony and five-position phrasing

F#m | A | E | D - SAME FIVE NOTES, NEW HARMONIC JOBS

Keep the exact five-position map from Levels 34-39. This level stops treating the five pitches as equally stable: hear the active chord, land on its strongest available tone, preserve F# as the governing tonic, and use the remaining notes as motion.

1. Target the active chord

F#m and A contain complete triads inside the five-note pool. E and D contain partial targets that must be heard clearly.

2. Keep F# as the center

A, E, and D are harmonic destinations inside the phrase, but the complete line should still feel governed by F# minor.

3. Complete only when needed

D and G# appear later as marked chord-completion tones. They are not new minor-pentatonic degrees.

Harmony overview - stable tones before speed

Use the strongest available target on beat 1; add the missing tone only in Module E.

Chord	Complete chord	Strong tones inside F# minor pentatonic	Missing completion
F# minor	F# A C#	F# root, A b3, C# fifth	none
A major	A C# E	A root, C# third, E fifth	none
E major	E G# B	E root, B fifth	G# third
D major	D F# A	F# third, A fifth	D root

Seven modules

- **A** Chord-target cells
- **B** Nearest-target voice leading
- **C** Five-position phrase studies
- **D** Relative major/minor responses
- **E** D and G# completion tones
- **F** Eight-bar center shift
- **G** Controlled improvisation

Written core workload

580 sounding tones: 240 chord-target tones, 60 held voice-leading tones, 80 five-position phrase tones, 60 relative-center response tones, 60 completion-cadence tones, 32 eight-bar study tones, and 48 controlled-model tones.

Level 40 - Chord Roles and Target Atlas

The same pitch changes function whenever the harmony changes.

F#m and A are complete

All three chord tones are already available. Practice naming root, third, and fifth instead of only naming scale degrees.

E uses root and fifth

E and B are strong. A is 11, C# is 13, and F# is 9. Use those colors in motion until G# is deliberately added.

D uses third and fifth

F# and A identify D major without the root. C# is major-7 tension; do not mistake it for a stable downbeat target.

Level 40 - Module A: P1 Chord-Target Cells

D-START AND U-START | NAME EVERY CHORD ROLE

established A-root frame; frets 4-7. Play every available strong target low to high, repeat the top note, and return.

F# minor - complete triad

14-note cell; targets: A(E5), C#(A4), F#(D4), A(D7), C#(G6), F#(B7), A(e5)

P5 14-17	F#(D16) -> A(G14) -> E(D14) -> F#(D16)	A(G14) -> A(G14) -> B(G16) -> A(G14)	C#(A16) -> C#(A16) -> B(A14) -> C#(A16)

Three stages for every route

1. Hold one note per bar. 2. Add two eighth-note pickups before each landing. 3. Replace the pickups while keeping the same destination and rhythmic placement.

Why these routes work

Root route names the harmony directly. Common-tone route minimizes motion. Fifth route keeps C# stable from F#m to A, moves to B over E, and returns to C# over F#m.

Progression	Route 1	Route 2	Route 3
| F#m | E | D | E |	F# - E - F# - E	A - B - A - B	C# - B - A - B
| F#m | A | E | D |	F# - A - E - F#	A - A - B - A	C# - C# - B - F#

Transfer rule

Use the nearest printed instance of each named pitch in the current position. The destination is fixed; the route and pickup notes are the variable. Do not jump to a favorite root when a closer third or fifth gives smoother voice leading.

Target substitution

Replay the phrase while changing only beat 1 of each bar: F#m can use F#, A, or C#; A can use A, C#, or E; E can use E or B.

Minor-center check

After bar 4, mute the strings and sing the tonic. If A arrives instead of F#, repeat the phrase with a low F# drone and reduce the density.

Level 40 - Module E: Completion-Tone Map

OUTSIDE NOTE = * | USE ONLY WHEN THE CHORD REQUIRES IT

D completes D major; G# completes E major. Both are marked outside the five-note pentatonic pool.

Position	D root for D major	G# third for E major	Frame relationship
P1 4-7	D(A5) finger 2	G#(D6) finger 3	inside / adjacent to established frame
P2 6-10	D(G7) finger 2	G#(B9) finger 3	inside / adjacent to established frame
P3 9-12	D(e10) finger 2	G#(B9) finger 1	inside / adjacent to established frame
P4 11-14	D(D12) finger 2	G#(G13) finger 3	inside / adjacent to established frame
P5 14-17	D(B15) finger 2	G#(e16) finger 3	inside / adjacent to established frame

Boundary rule

D and G# are chord-completion tones, not new pentatonic degrees. Return to the five-note pool immediately after their harmonic job is clear.

Intonation rule

Fret these notes cleanly before using bends or slides. A vague C-to-C# or G-to-G# approximation is not a substitute for a precisely targeted chord tone.

The final F# must sound more final than the A at bar 4 even though the pitch collection never changed.

Drone pass

Bars 1-4 over A drone; bars 5-8 over F# drone.

No-drone pass

Remove both drones and preserve the center shift through targets and phrase endings.

A relative-key modulation can occur without changing the pitch pool; the listener follows the harmony, accents, and cadences.

Level 40 - Module G: Phrase Models

3 MODELS x 16 NOTES = 48 | TWO-BAR ENDINGS: F#, A, OR C#

The final A is the fifth of D and b3 of F# minor. Leave space before the next tonic return.

Level 40 - Practice, Mastery Gate, and Log

Harmony accuracy comes before speed, density, or articulation.

NEXT: LEVEL 41 - A MINOR PENTATONIC FIVE-POSITION MAP

Nine-phase practice progression

1. Say the four chord spellings.
2. Play one Module A position with both pick starts.
3. Sustain the three Module B routes.
4. Add two pickups before each landing.
5. Learn one Module C phrase per session.
6. Pair its A call with its F#m answer.
7. Add D and G# completion tones.
8. Perform the eight-bar center shift.
9. Improvise through all three progression cards.

Error diagnosis and repair

WRONG TARGET: stop on beat 1 and name the chord role.
A SOUNDS LIKE HOME: reduce density and end three phrases on F#.
E OR D IS UNCLEAR: isolate root/fifth or third/fifth target cells.
COMPLETION TONE BLURS: fret D or G# directly before sliding or bending.
FRET FISHING: look at the destination before leaving the prior note.
RHYTHM COLLAPSE: return to one quarter note per click.

Mastery gate before Level 41

Name the role of all five pitches over F#m, A, E, and D; play all twenty Module A target cells with both pick starts; perform three voice-leading routes in every position; complete all five four-bar phrases without losing F# as tonic; make the A call and F#m answer sound like related but differently centered phrases; use D and G# only as intentional completion tones; perform the eight-bar center shift without a drone; and record one controlled pass through each progression card on two separate days.

Practice log

Date	Position / progression	D/U	BPM	Target accuracy	F# center?	Weak chord / landing	Next target

Section boundary

Level 40 completes the relative-minor re-centering branch. Level 41 introduces a genuinely new pitch set: A minor pentatonic, 1-b3-4-5-b7.
