Scale Exercises - Section V, Level 42

A minor pentatonic horizontal movement and articulation

FIXED KEY: A | FRETS 5-17 | 8 MODULES

Turn the five vertical frames from Level 41 into six horizontal melodies. First relocate without noise, then control slides and legato, then shape pitch with calibrated bends, blue-third inflection, releases, and vibrato.

1. Move without noise

Map six one-string lanes. Separate a silent relocation from an intentional slide, and land on named destinations without searching.

2. Connect without extra attacks

Use hammer-ons, pull-offs, and one-pick seam chains. Every unpicked note remains rhythmically exact and equal in volume.

3. Shape pitch deliberately

Match whole-step bends to printed targets, shade C toward C# without reaching it, and add vibrato only after the pitch is stable.

Worked overview - low E lane across all five positions

The interior notes are the shared anchors from the Level 41 five-position map.

MODULE A-B	Silent lanes and direct landings	168 tones / 168 attacks
MODULE C-E	Timed slides, legato, and one-pick chains	384 tones / 180 attacks
MODULE F-H	Bends, blue-third shade, roots, and cadences	116 events / 80 attacks
CORE WORKOUT	**668 counted sounding events / 428 pick attacks**	

Session protocol

1. Map one horizontal lane.
2. Play it with silent station shifts.
3. Add direct destination landings.
4. Convert one seam to timed slides.
5. Play the matching legato cell.
6. Reduce the seam to one pick attack.
7. Calibrate one bend and one blue shade.
8. Finish with one root cadence.

Count and safety boundary

Use support fingers for bends, mute adjacent strings, and stop if bending or a wide position change causes pain. The blue-third shade is not a failed C# bend: establish C# as the ceiling, then stop intentionally below it.

IMPORTANT Expression does not excuse late timing, inaccurate pitch, or string noise.

A-root atlas and attack rules

A roots: E5, D7, B10, A12, G14, E17, e5, e17

Picked modules: complete D-start and U-start passes without resetting at a string, station, seam, root, or turnaround.

Legato modules: alternate through actual pick attacks only. Hammer, pull, slide arrival, bend arrival, release, and vibrato pulses do not receive extra attacks.

BLUE-THIRD BOUNDARY

C# is not added to the pentatonic map. It appears only as a calibration ceiling for the expressive C-to-C# inflection. The printed b<(target) bend must stop below the full half-step pitch.

Linked legato challenge

Play P1 through P5 with one beat of rest between positions. Then reduce the rest to half a beat and finally connect the twelve attacks of each frame without a pick reset. Accent each A root once, then remove every root accent.

5 TONES / 1 ATTACK PER PHRASE

HAMMER - SLIDE - RETURN SLIDE - PULL OFF

One attack must produce all five tones. The arrival and return slides remain on the grid; the final pull-off speaks clearly without a second attack.

Module E - one-pick position-seam chains

5 TONES / 1 ATTACK PER PHRASE

HAMMER - SLIDE - RETURN SLIDE - PULL OFF

One attack must produce all five tones. The arrival and return slides remain on the grid; the final pull-off speaks clearly without a second attack.

target | bend | bend-release | target + vibrato

INTONATION RULE

Hold the bent pitch before releasing. If the bend is flat or sharp, compare it immediately with the printed target fret. Intonation outranks speed.

Scale Exercises - Section V, Level 42

Module F - blue-third inflection and bend-release control

C TOWARD C# | FULL TARGET IS THE CEILING

DISTINGUISH A FULL HALF-STEP BEND FROM A DELIBERATE SHADE

First play C#. Then bend C fully to C# so the upper boundary is known. Finally use b<(target) to stop below C#, release to C, and finish with centered vibrato.

G - C fret 5 toward C# fret 6

```
G|--6----5b(6)----5b<(6)r5----5~~~~~~|
```

C# target | full half-step bend | blue shade and release | C vibrato

The third event must remain below C#. Do not let the shade drift upward into a second full bend.

G - C fret 17 toward C# fret 18

```
G|--18----17b(18)----17b<(18)r17----17~~~~~~|
```

C# target | full half-step bend | blue shade and release | C vibrato

The third event must remain below C#. Do not let the shade drift upward into a second full bend.

B - C fret 13 toward C# fret 14

```
B|--14----13b(14)----13b<(14)r13----13~~~~~~|
```

C# target | full half-step bend | blue shade and release | C vibrato

The third event must remain below C#. Do not let the shade drift upward into a second full bend.

High e - C fret 8 toward C# fret 9

```
e|--9----8b(9)----8b<(9)r8----8~~~~~~|
```

C# target | full half-step bend | blue shade and release | C vibrato

The third event must remain below C#. Do not let the shade drift upward into a second full bend.

Muting and physical boundary

Bend toward the center of the neck, support the active finger where practical, mute strings above the bend with the fretting index and below it with the picking hand, and stop immediately if the motion causes pain. Do not substitute the three-semitone pentatonic gaps A-C or E-G as bends in this level.

Module G - A-root vibrato map

8 ROOT LOCATIONS | CENTER FIRST, WIDTH SECOND

SUSTAIN THE TONIC WITHOUT DRIFTING SHARP OR FLAT

Hold each A for four beats. Pass 1 uses four narrow pulses; Pass 2 uses six pulses; Pass 3 begins with one straight beat and then adds free vibrato.

4 pulses | 6 pulses | free

Three vibrato-control passes

1. Narrow pulse	Four equal pulses across the whole note. Return to the original A between every pulse.
2. Faster pulse	Six smaller pulses without increasing width or raising the pitch center.
3. Delayed vibrato	Hold one beat straight, begin vibrato on beat 2, and taper the width by beat 4.

P1-P3: TURN TECHNIQUE INTO SHORT TONIC-RESOLVING PHRASES

Practice each cadence alone. Count only actual attacks; do not add a pick to a hammer, pull, slide arrival, bend arrival, release, or vibrato pulse.

P4-P5 AND LINKED CADENCE CIRCUIT

EVERY PHRASE MUST MAKE A SOUND LIKE HOME

The final root is not merely the last fret. Let the preceding color note or bend create a reason for the A resolution.

Linked cadence circuit - 43 sounding tones / 20 attacks

Play P1-P5 with one bar of rest between phrases. Reduce the rest to two beats, one beat, and finally no extra pause. Keep A as the audible tonic, preserve every printed attack count, and record one pass to check for hidden extra picks or pitch drift.

Scale Exercises - Section V, Level 42

Practice progression, repair rules, mastery gate, and log

NEXT: LEVEL 43 - A BLUES SCALE AND b5 CONTROL

TEN-PHASE PRACTICE PROGRESSION

1. Say every lane note and degree before playing.
2. Learn one silent lane at one tone per click.
3. Complete all six lanes with both pick starts.
4. Add direct destination landings and remove fret fishing.
5. Convert one seam from four attacks to one attack.
6. Play five legato cells with equal picked and unpicked volume.
7. Match one whole-step bend, then add the release.
8. Establish C# as the ceiling, then play a controlled shade below it.
9. Hold all eight A roots with centered vibrato.
10. Link the five cadences without extra attacks.

Error diagnosis

- NOISY SHIFT - release earlier; move thumb with hand.
- FRET FISHING - see and name the target before leaving.
- WEAK LEGATO - reduce travel; keep the destination fretted.
- LATE SLIDE - shorten the motion; count the arrival.
- FLAT/SHARP BEND - compare with the target immediately.
- BLUE SHADE REACHES C# - reduce the motion.
- VIBRATO DRIFT - narrow the pulse until center returns.
- PAIN/TENSION - stop; do not force the bend or stretch.

Mastery gate before Level 43

Name all six lanes; execute all silent shifts and 24 timed slides; play five legato cells and 24 one-pick chains without extra attacks; match nine whole-step bends; distinguish four full half-step bends from four blue-third shades; hold eight roots with centered vibrato; and link five cadences on two separate days.

Practice log

Date	Focus	D/U	BPM	Pitch clean?	Weak lane / seam / bend / cadence	Next target

NEXT Level 43 adds Eb, the b5 blue note, and trains 4-b5-5 and 5-b5-4 resolutions without treating the added note as an automatically stable resting tone.
