Scale Exercises - Section V, Level 43

A blues scale map and blue-note control

FIXED KEY: A | ADD Eb = b5 | 9 MODULES

Add one note to the complete A-minor-pentatonic map, then decide exactly how that note behaves. Eb may connect D to E, slide chromatically, or remain exposed as deliberate tension - but never by accident.

1. Preserve the skeleton

A C D E G remains the five-note framework. Add Eb only where the phrase or scale calls for b5.

2. Control the resolution

Train 4-b5-5, 5-b5-4, passing versus resting duration, and chromatic slide timing.

3. Keep the role audible

Accent b5 while learning, then remove the accent without losing its rhythmic placement or intended tension.

Worked example - one-octave A blues scale at fret 5

A C D Eb E G A. The octave root is repeated to begin the descent.

```
ASCENDING
Nte|A---C---D---Eb--E---G---A---|
Deg|1---b3--4---b5--5---b7--1---|
Fng|1---4---1---2---3---1---3---|
  e|-----------------------------|
  B|-----------------------------|
  G|-----------------------------|
  D|-------------------5---7---|
  A|--------5---6---7-----------|
  E|5---8-----------------------|
```

HEAR THIS D-Eb-E is a chromatic approach to degree 5. First exaggerate Eb; then make it equal in volume and let the resolution create the meaning. The complete ascent-and-descent cell appears on page 3.

Written core workload

MODULE	TONES / ATTACKS
Reference cells	40 / 40
Five positions	144 / 144
Resolution cells	76 / 76
Pass/rest	48 / 48
Slides + seams	60 / 20
Rhythm + audit	54 / 54
TOTAL	**422 / 382**

First-session protocol

1. Map six Eb sites.
2. Learn one octave.
3. Pick every chromatic cell.
4. Add slides only after timing is clean.

Scale Exercises - Section V, Level 43

Blue-note atlas and five-position overview

D - Eb - E ON ALL SIX STRINGS

THE b5 IS ALWAYS ONE FRET ABOVE D AND ONE FRET BELOW E

Spell the pitch as Eb in A blues. Learn the six practical D-Eb-E sites first; every later position and phrase is built from these exact chromatic locations.

Core blue-note atlas

String	D = 4	Eb = b5	E = 5	Tab
Low E	10	11	12	E|10-11-12|
A	5	6	7	A|5-6-7|
D	12	13	14	D|12-13-14|
G	7	8	9	G|7-8-9|
B	15	16	17	B|15-16-17|
High e	10	11	12	e|10-11-12|

Blue-note rules

PASS	Use Eb between D and E without changing the pulse.
REST	Hold Eb only when the exposed tension is intentional.
SLIDE	Count Eb as a sounding arrival even when it is not re-picked.
RESOLVE	Move to D or E unless the phrase deliberately stays open.
SPELL	Call the note Eb, the flat fifth of A.

Five-position insertion summary

Pos	Frame	Up	Cell	Blue-note locations
P1	frets 5-8	14	28	Blue notes: A-string fret 6 and G-string fret 8.
P2	frets 7-11	15	30	Blue notes: low-E fret 11, G-string fret 8, and high-e fret 11.
P3	frets 9-13	15	30	Blue notes: low-E fret 11, D-string fret 13, and high-e fret 11.
P4	frets 12-16	14	28	Blue notes: D-string fret 13 and B-string fret 16.
P5	frets 14-18	14	28	Blue notes: B-string fret 16 and the A-string fret-18 octave extension.

The former pentatonic frames may widen by one fret. Release and reform instead of forcing a permanent five-fret stretch.

Module H - blue-note rhythmic displacement

ON-BEAT | OFFBEAT | FINAL TRIPLET

MOVE Eb THROUGH THE GRID WITHOUT CHANGING THE FRETS

Use G-string frets 7-8-9. R is a measured rest. The note sequence remains D-Eb-E; only the rhythmic location of Eb changes.

1. b5 ON THE BEAT

```
Cnt|1---&---2---&---3---&---4---&---|
Nte|D---R---Eb--E---D---R---Eb--E---|
  G|7-------8---9---7-------8---9---|
```

Accent Eb on the first pass. Remove the accent while preserving the exact placement.

2. b5 ON THE OFFBEAT

```
Cnt|1---&---2---&---3---&---4---&---|
Nte|D---Eb--E---R---D---Eb--E---R---|
  G|7---8---9-------7---8---9-------|
```

Accent Eb on the first pass. Remove the accent while preserving the exact placement.

3. b5 ON THE FINAL TRIPLET SUBDIVISION

```
Cnt|1---trip-let-2---trip-let-3---trip-let-4---trip-let-|
Nte|D---R---Eb--E---R---R---D---R---Eb--E---R---R---|
  G|7-------8---9-----------7-------8---9-----------|
```

Accent Eb on the first pass. Remove the accent while preserving the exact placement.

Module I - resolution audit cards

CLASSIFY | REVERSE THE ROLE | REPAIR

IS Eb PASSING, RESTING, OR UNINTENTIONALLY STRANDED?

Play each six-tone card, classify the role of Eb, then make the opposite choice on the second pass. The listener should hear the change without seeing the tab.

1. LOW-E PASS

```
E|10--11--12--15--12--10--|
```

DEG 4-b5-5-b7-5-4

The b5 passes to 5.

2. A-STRING HOLD

```
A|5---6---7---10--7---6~~~~|
```

DEG 4-b5-5-b7-5-b5

The b5 is the final tension.

3. D-STRING PASS

```
D|10--12--13--14--12--10--|
```

DEG b3-4-b5-5-4-b3

The b5 connects 4 to 5.

4. G-STRING HOLD

```
G|12--9---8---7---5---8~~~~|
```

DEG b7-5-b5-4-b3-b5

The b5 is sustained deliberately.

5. B-STRING PASS

```
B|15--16--17--15--10--10~~~~|
```

DEG 4-b5-5-4-1-1

The b5 resolves immediately.

6. HIGH-E HOLD

```
e|8---10--11--12--15--11~~~~|
```

DEG b3-4-b5-5-b7-b5

The b5 remains exposed at the end.

Scale Exercises - Section V, Level 43

Practice progression, error diagnosis, and variations

MAP FIRST | SPEED LAST

TEN-PHASE PRACTICE PROGRESSION

1. Name six Eb sites and the A-string fret-18 extension.
2. Play the one-octave cell at one note per click.
3. Link the two-octave cell with both pick starts.
4. Compare skeleton and blues insertion in each position.
5. Complete six picked 4-b5-5 / 5-b5-4 cells.
6. Add five four-note resolution pairs.
7. Contrast passing and resting Eb on all strings.
8. Convert the chromatic sites into two-attack slides.
9. Link four seams and three rhythmic placements.
10. Audit six phrases and reverse the role of Eb.

Error diagnosis

- MISSING b5 - say 4-b5-5 before playing.
- D# SPELLING - use Eb in the A-blues context.
- RUSHED HALF STEPS - return to one note per click.
- ACCIDENTAL HOLD - choose passing or resting first.
- EXTRA SLIDE PICK - rehearse 6 tones / 2 attacks.
- RIGID STRETCH - release and reform the extension.
- PICK RESET - air-pick the full cell count.
- PAIN/TENSION - stop and shorten the position span.

After the basic workbook is clean

1. Accent b5, then 4, then 5; finally remove all accents.
2. Begin selected passes descending from the highest note.
3. Play the picked triplets as legato without changing timing.
4. Move each seam phrase to a new octave by note name.
5. Hold Eb for one, two, and four beats before resolving.
6. Record one pass and listen for rushed semitone motion.

Advancement rules

Add 2 BPM only after three clean runs at the current module length. After two errors, reduce 4-6 BPM or shorten the exercise to one chromatic site. Increase route length before speed when the map is weak; increase speed only when the intended role of Eb remains audible.

Mastery gate, practice log, and next level

NEXT: LEVEL 44 - BLUES VOCABULARY

LEVEL 43 MASTERY GATE

Name every printed Eb by string and fret; play both reference cells and all five positions with D-start and U-start; complete six resolution triplets, five four-note cells, six pass/rest comparisons, six slide chains, four seam phrases, three rhythmic placements, and six audit cards; sustain or resolve Eb deliberately; and complete the workbook on two separate clean days.

Completion audit

- [ ] Six core Eb locations named
- [ ] One-octave cell - both pick starts
- [ ] Two-octave cell - both pick starts
- [ ] Five position cells
- [ ] Six resolution triplets
- [ ] Five four-note pairs
- [ ] Six pass/rest comparisons
- [ ] Six two-attack slide chains
- [ ] Four seam phrases
- [ ] Three rhythmic placements
- [ ] Six audit cards repaired
- [ ] Two separate clean days

Practice log

NEXT Level 44 converts these controlled resolutions into blues vocabulary: blue-third motion, 4-b5-5 licks, b7-to-1 cadences, call-and-response construction, lick recombination, tonic endings, and functional turnarounds.
