Scale Exercises - Section V, Level 47

A major and A minor pentatonic mixing - controlled color over A7-D7-E7

FIXED KEY: A | 10 MODULES | 872 TONES

Levels 41-46 established the A-minor map, blues vocabulary, shuffle form, and dominant chord targets. Level 47 adds A-major-pentatonic color without turning the neck into an undifferentiated eight-note scale. The governing skill is selection: keep the motif and rhythm stable, change one color at a time, and let the active chord determine the landing note.

1. Anchor first

A and E belong to both pentatonic sets. Use one as the pivot before introducing B, C#, F# or C, D, G.

2. Control the color pairs

C/C# changes the third; F#/G changes 6 versus b7; B/D changes 2 versus 4. Hear each contrast.

3. Target the chord

A7 welcomes C# and G; D7 needs F# and C; E7 needs B, D, and the completion tone G#.

Two pitch pools - one tonic

```
A MAJOR PENTATONIC:  A  B  C# E  F#
Degrees:             1  2  3  5  6

A MINOR PENTATONIC:  A  C  D  E  G
Degrees:             1  b3 4  5  b7

COMMON ANCHORS:      A  E
COMBINED PALETTE:    A B C C# D E F# G
E7 COMPLETION:       G#* - not a pentatonic member
```

COLOR KEY C = common M = major-only m = minor-only * = completion tone

Written core workload

Module	Tones
A - anchor branches	80
B - third control	72
C - 6/b7 + 2/4	80
D - paired endings	80
E - color switches	96
F - overlap seams	48
G - chord cells	120
H - call/answer	80
I - 3 choruses	144
J - model + repair	72
TOTAL	872

Practice sequence

Begin with one position and clean tone. Speak M, m, C, or * before each note. Next play the color pair against an A drone. Then use an A7-D7-E7 backing track and require a chord tone on beat 1. Speed is secondary; the listener must be able to hear when the phrase changes from major color to minor color.

CORE RULE Do not run the combined eight-note palette straight up and down as the default exercise.

Scale Exercises - Section V, Level 47

Color grammar, chord-role matrix, and anti-soup rules

CHOOSE A COLOR - DO NOT MERELY ADD NOTES

THE SAME NOTE MAY BE A CHORD TONE, A COLOR TONE, OR A PROBLEM DEPENDING ON THE BAR

Combined palette over the three dominant chords

Note	Set	A7 role	D7 role	E7 role	Primary use
A	C	R	5	11	tonic anchor and common pivot
B	M	9	13	5	major openness; strong E7 fifth
C	m	b3 / #9	b7	b13	minor color; strong D7 flat seventh
C#	M	3	M7 tension	13	major-third identity over A7
D	m	11	R	b7	IV root and V flat seventh
E	C	5	9	R	common anchor; stable over A7 and E7
F#	M	13	3	9	major-sixth color and D7 third
G	m	b7	11	#9	minor/blues color and A7 flat seventh
G#	*	M7	b5	3	E7 completion only

Three controlled color pairs

Pair	Major color	Minor color	Effect
Third	C# = 3	C = b3	bright / dominant vs minor / blue
Upper color	F# = 6	G = b7	sweet 13 vs dominant-blues b7
Suspension	B = 2	D = 4	open 9 vs suspended 11

Anti-chromatic-soup rules

1. Keep one common anchor or one motif constant.
2. Change one color pair at a time.
3. Put a chord tone on beat 1 of a new bar.
4. Treat C-C# as a decision, not a random run.
5. Use G# only to define or approach E7.
6. Leave space after a strong color statement.

Mixing grammar

```
ANCHOR -> COLOR -> CHORD TARGET -> SPACE
A or E -> one selected pair -> R / 3 / 5 / b7 -> listen
```

Scale Exercises - Section V, Level 47

P1 color foundation - common anchors, color pairs, and two cadence identities

P1 | 48 TONES | E5, D7, e5

COMMON TONES HOLD THE NECK AREA TOGETHER; ONE COLOR NOTE CHANGES THE IDENTITY

P1 spans frets 4-8. A and E are common to both pentatonic sets. Use them as pivots. M = major-only, m = minor-only, C = common. Do not accelerate through the chromatic C/C# contrast.

A anchor - branch to both thirds and both sevenths

Barline after note 4. Keep one rhythmic or contour feature while changing the color set.

Scale Exercises - Section V, Level 47

P5 color foundation - common anchors, color pairs, and two cadence identities

P5 | 48 TONES | E17, G14, e17

COMMON TONES HOLD THE NECK AREA TOGETHER; ONE COLOR NOTE CHANGES THE IDENTITY

P5 spans frets 14-17. A and E are common to both pentatonic sets. Use them as pivots. M = major-only, m = minor-only, C = common. Do not accelerate through the chromatic C/C# contrast.

A anchor - octave third and seventh colors

```
Nte|A---C#--A---C---A---F#--G---A---
Deg|1---3---1---b3--1---6---b7--1---

Scale Exercises - Section V, Level 47

P5 harmonic application - hybrid dominant cells and color-changing answers

P5 | 40 TONES | A7-D7-E7

THE SCALE POOL MAY CHANGE; THE ACTIVE CHORD STILL DECIDES THE LANDING NOTE

Each dominant cell combines major and minor pentatonic colors but begins and ends on a chord tone. G# is marked * because it completes E7 and belongs to neither A pentatonic set. The call-and-response cells preserve the same neck area while changing color identity after note 4.

A7 hybrid target cell

```
Nte|A---C---C#--E---G---E---C#--A---
Rol|R---b3--3---5---b7--5---3---R---
Col|C---m---M---C---m---C---M---C---

  E|17--------------|----------------
```

Barline after note 4. Keep one rhythmic or contour feature while changing the color set.

Scale Exercises - Section V, Level 47

Module B - exact C/C# third control on all six strings

6 SITES | 72 SOUNDING TONES | 48 ATTACKS

THE MINOR THIRD AND MAJOR THIRD MUST SOUND LIKE TWO INTENTIONAL DESTINATIONS

Each site contains three passes: four separately fretted tones, an up-slide plus down-slide, and a bend-release followed by an A-root resolution. Count slide and bend arrivals as sounding tones but not as new pick attacks. Match C# before using the bend.

Low E: C fret 8 / C# fret 9

```
Fretted  E|--8--9--8--9--|
Slides   E|--8/9--9\8--|
Bend     E|--8b(9)r8--5--|
Notes       C  C#  C  C# | C-C# C#-C | C-C#-C  A
```

Fretted = 4 tones; slides = 4 tones; bend-release plus A = 4 tones. Eight pick attacks total.

A: C fret 15 / C# fret 16

```
Fretted  A|--15--16--15--16--|
Slides   A|--15/16--16\15--|
Bend     A|--15b(16)r15--12--|
Notes       C  C#  C  C# | C-C# C#-C | C-C#-C  A
```

Fretted = 4 tones; slides = 4 tones; bend-release plus A = 4 tones. Eight pick attacks total.

D: C fret 10 / C# fret 11

```
Fretted  D|--10--11--10--11--|
Slides   D|--10/11--11\10--|
Bend     D|--10b(11)r10--7--|
Notes       C  C#  C  C# | C-C# C#-C | C-C#-C  A
```

Fretted = 4 tones; slides = 4 tones; bend-release plus A = 4 tones. Eight pick attacks total.

G: C fret 5 / C# fret 6

```
Fretted  G|--5--6--5--6--|
Slides   G|--5/6--6\5--|
Bend     G|--5b(6)r5--7--|
Notes       C  C#  C  C# | C-C# C#-C | C-C#-C  A
```

Fretted = 4 tones; slides = 4 tones; bend-release plus A = 4 tones. Eight pick attacks total.

B: C fret 13 / C# fret 14

```
Fretted  B|--13--14--13--14--|
Slides   B|--13/14--14\13--|
Bend     B|--13b(14)r13--10--|
Notes       C  C#  C  C# | C-C# C#-C | C-C#-C  A
```

Fretted = 4 tones; slides = 4 tones; bend-release plus A = 4 tones. Eight pick attacks total.

High e: C fret 8 / C# fret 9

```
Fretted  e|--8--9--8--9--|
Slides   e|--8/9--9\8--|
Bend     e|--8b(9)r8--5--|
Notes       C  C#  C  C# | C-C# C#-C | C-C#-C  A
```

Fretted = 4 tones; slides = 4 tones; bend-release plus A = 4 tones. Eight pick attacks total.

Scale Exercises - Section V, Level 47

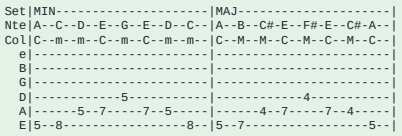

Module E - two-bar color switching without losing the motif

6 STUDIES | 96 TONES

BAR 1 ESTABLISHES ONE COLOR; BAR 2 RETAINS THE SHAPE BUT CHANGES THE PITCH POOL

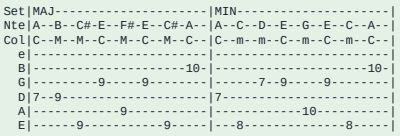

Each study contains eight notes per bar. Preserve the subdivision and the phrase contour across the barline. The labels MIN and MAJ identify the available pitch pool, not the quality of the backing chord.

1. P1 - minor to major over A7

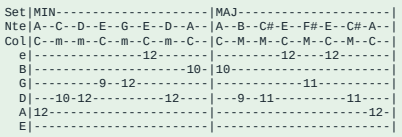

Keep the barline exact. Do not fill the transition with an unplanned chromatic note.

2. P2 - major to minor over A7

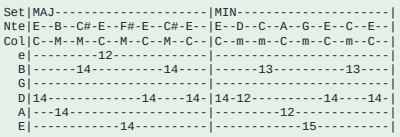

Keep the barline exact. Do not fill the transition with an unplanned chromatic note.

3. P3 - A-root pivot, minor to major

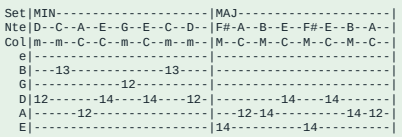

Keep the barline exact. Do not fill the transition with an unplanned chromatic note.

4. P4 - E-anchor pivot, major to minor

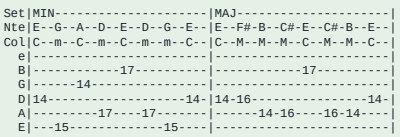

Keep the barline exact. Do not fill the transition with an unplanned chromatic note.

5. P4 - D7: minor color then major color

Keep the barline exact. Do not fill the transition with an unplanned chromatic note.

6. P5 - E7: minor color then major color

Keep the barline exact. Do not fill the transition with an unplanned chromatic note.

Scale Exercises - Section V, Level 47

Module F - four position-overlap cells for fixed-key color changes

4 SEAMS | 48 TONES

MOVE THROUGH THE NECK WHILE ALTERNATING COMMON, MAJOR-ONLY, AND MINOR-ONLY NOTES

These are not eight-note scale runs. Each twelve-note seam is organized as a series of local color decisions around A or E anchors. Say C, M, or m before each note and keep the shift silent.

P1 <-> P2 overlap

```
Nte|E--F#-G--E--C#-C--A--B--C--A--F#-G--

Scale Exercises - Section V, Level 47

Practice progression, error diagnosis, mastery gate, and Section V continuation

ADVANCE BY COLOR CONTROL - NOT NOTE COUNT

TEN-PHASE PRACTICE PROGRESSION

1. Name both pitch pools and all three color pairs without the guitar.
2. Play one position foundation page against an A drone.
3. Complete all six C/C# third-control sites with matched intonation.
4. Play one two-bar switch study without changing rhythm at the barline.
5. Complete all four overlap seams and say C, M, or m aloud.
6. Play A7, D7, and E7 hybrid cells in one position.
7. Complete the major-question/minor-answer and reverse pair in all five positions.
8. Play the minor-only and major-only twelve-bar passes on separate days.
9. Play the mixed pass and model chorus with beat-one targets intact.
10. Improvise three choruses: minor only, major only, then controlled mixture.

Error diagnosis

Problem	Repair
CHROMATIC SOUP	Return to A or E; select one color pair only.
WEAK BARLINE	Hold the next chord tone for a whole note.
C/C# BLUR	Play both fretted targets before bending or sliding.
G# OVERUSE	Restrict G# to E7 or a direct E7 approach.
MOTIF LOST	Keep the rhythm; change only the final two notes.
FORM LOST	Return to roots for one chorus; count bars aloud.

Mastery gate before Level 48

- ☐ Play all five foundation pages and name every color note.
- ☐ Complete all six two-bar switches and four overlap seams.
- ☐ Perform minor-only, major-only, and mixed twelve-bar choruses without losing the form.
- ☐ Match C# at all six bend sites without drifting sharp.
- ☐ Make A7, D7, and E7 audible through the hybrid target cells.
- ☐ Record one mixed chorus in which every color change can be explained afterward.

Practice log

NEXT: Level 48 combines blues form, color mixing, chord targeting, motif development, and call-and-response into a three-chorus improvisation synthesis.

Date	Focus	Position / chorus	BPM	Clean?	Color or form note	Next target
